Census of India 2027

Houselisting and Housing Census: April-September, 2026

January 1, 2026

From the desk of the Census Commissioner of India

On behalf of the Office of the Registrar General & Census Commissioner of India, I am happy to welcome all the Enumerators, Supervisors, and other functionaries of Census 2027, who are privileged to be part of one of the most reputed, largest administrative and statistical exercises in the World. As many of you may already know, the Census provides foundation for our democracy due to its importance enunciated in the Constitution of India.

Population Census is being conducted in India since 1872. The next decennial Census will be 16th Census in the country and 8th after Independence. Census is the biggest source of primary data at Village, Town and Ward level. Indian Census has a history of 150 years providing micro level data on various parameters including Housing Condition, Amenities & Assets, Demography, Religion, SC & ST, Language, Literacy & Education, Economic Activity, Migration and Fertility. The data collected is of utmost importance, as it caters to the data needs for planning and development of the Nation.

This Census is unique and remarkable of being the first Census of India in which Census data collection will be done through digital tools/means. Enumerators will collect data from households using dedicated mobile applications on their own smartphones. In addition, households will be provided with the option of self-enumeration through a designated web portal. However, all data submitted through self-enumeration will be subject to verification by Enumerators and Supervisors to ensure accuracy and completeness. During first phase of Census, i.e. Houselisting and Housing Census, the Enumerators will be basically collecting data on housing condition, household amenities and assets.

I have full confidence in your sincere efforts. I once again welcome you to this task of national importance and express my best wishes for your successful participation in this national endeavour.

Mritunjay Kumar Narayan, IAS
Registrar General & Census Commissioner of India

List of Abbreviations

APK	Android Package Kit
App	Application
Bio-gas	Biological Gas
CMMS	Census Management & Monitoring System
DCO	Directorate of Census Operations

ST	Scheduled Tribe
SUV	Sports Utility Vehicle
TV	Television
UT	Union Territory
Wi-Fi	Wireless Fidelity

IMPORTANT WORKS TO BE DONE BY ENUMERATOR AND SUPERVISOR

Enumerator:

1. Obtain HLB map from mobile app/charge officer, verify HLB boundary on ground, identify roads/lanes/landmarks etc., systematic building identification (NW→SE) and numbering of buildings/census houses, draw physical layout map.
2. Install and login to HLO app, enter expected number of buildings and census houses from layout map, start door to door visit and recording information in mobile app, sync data regularly, complete all buildings/census houses in HLB, final review for omission/duplication, mark HLB as complete
3. If self-enumeration done by household-obtain SE ID, verify and accept or edit data.

Supervisor:

4. Verify all HLB boundaries on ground and ensure no omission/no duplication, communicate to charge officer if there is any change in HLB boundary
5. Login using supervisor credentials, monitor progress of each enumerator, check coverage of all buildings and census houses in each HLB, identify errors/inconsistencies and communicate to enumerator, ensure enumerator syncs data.

IMPORTANT INSTRUCTIONS

1. Please get yourself familiar with the steps involved in Houselisting & Housing Census, strictly follow the time frame and complete various activities involved well in time. Attend the training sessions and thoroughly study the Houselisting & Housing questions (specimen is provided as an **Annexure** in the manual). Additionally, carefully read and understand the question-by-question instructions given in the manual, and refer to the corresponding screenshots pertaining to mobile App provided for your reference.
2. Obtain all the materials needed for Houselisting before you leave the training centre at the end of the last training session. If you have any doubts, make sure to clarify them with your trainers before beginning the field work.
3. Ensure that the Location Particulars assigned to you, match with your assigned unit as mentioned in your Appointment Order before proceeding with your assigned Houselisting Block (HLB). In case of any mismatch, promptly contact your Supervisor and Charge Officer.
4. Always carry and display your Identity Card while doing field work. Further, you must carry the original Identity Document that you have mentioned during your registration as Enumerator & Supervisor in CMMS. The respondent may like to match it for authentication on scanning the QR code given in your Appointment Letter and Identity Card where your Identity document type and number will be visible.
5. In case of any change in assigned HLB number, you should obtain new Identity Card and Appointment Letter generated through CMMS portal by Charge Officer.
6. Please ensure that you carry the List of Scheduled Castes & Scheduled Tribes pertaining to your State/Union Territory before proceeding to the field work. State/UT-wise pdf copy of SC/ST list is also available in the HLO App.
7. Identify the Houselisting Block (HLB), go around with your Supervisor to clearly identify its boundaries and key landmarks. In case of any difficulty in locating the allotted block, immediately contact your Charge Officer. Ensure that boundaries of the Houselisting Block do not overlap with adjacent blocks and at the same time ensure no area in your block is left out.
8. Before starting the field work, meet prominent persons of the area and explain them the objective of Census along with your purpose of visit and seek their cooperation and support.
9. Assign number to each Building (where no building number has been provided by the local authority) with marker pen and write number of census houses in it within bracket of your Houselisting Block.

10. It is essential to visit each and every Building and Census House, residential, non-residential, commercial, or otherwise and accurately record all relevant details. Ensure that every Census House in the buildings is included without any omissions or duplications.
11. Show respect and greet the respondents appropriately as they are the ones who will provide all necessary information for completion of the assignment. Do not ask any questions other than those notified. Record only the correct information as provided by the respondent.
12. Maintain confidentiality as per the Census Act. Do not share individual responses with or allow inspection of Census records by any unauthorized persons other than those who are duly appointed in official capacity for Census 2027.
13. Always maintain timelines set for the work in mind and ensure that the work is being done and completed within the stipulated time limits.
14. There may be technical glitches in digital systems due to various reasons. You need to keep patience, calmness and ask for help from your higher ups like Supervisor, Field Trainer, Charge Officer. You may also contact helpdesk at concerned DCO.
15. If, in any case, the app is uninstalled, the data collected but not synced may be copied in the writing pad provided to avoid data loss before the uninstallation. These written data may be inserted in the app afterwards without visiting the already covered census houses.
16. Do not change the mobile device unnecessarily. Change of device may only be done in unavoidable circumstances. This will resolve most issues in the field regarding data loss and syncing. Please remember that if new device is registered, the old device will be deregistered automatically and data cannot be synced from the old device afterwards.
17. Before starting field work, you have to select language from drop down menu. State specific language.
18. Enumerator should be cautious while entering data. The data should be entered correctly. If the data is checked by supervisor and found to be incorrect, the whole record needs to be entered again by the enumerator. To avoid extra work, the data collected and entered should be correct at first instance.

DO'S and DON'TS

Do's	Don'ts
i. Download the Mobile App from Google Play Store/ Apple App store only. ii. Check for App updates, if any, from Google Play Store/ App store from time to time and ensure the App is updated. iii. Login and use the mobile App in the registered single mobile device only. iv. Register device only for a single User-id login. v. Register your device only after Houselisting Block (HLB) allotment is done in CMMS Portal by the Charge Officer. The login credentials will be provided to you through SMS/E-mail by the Charge Officer. vi. Change the default password of Mobile App to ensure security. vii. Ensure that the Location Particulars displayed on the mobile App screen are as per your Appointment Order and then only then proceed with field work of the assigned HLB. viii. In case of any difficulty, discrepancy in location particulars, difficulty in registration of device, etc., contact your Charge Officer. ix. Upload/Sync the entered data on central Server after enumeration of every 5-6 Houses/ Households so as to prevent data loss. x. Remember to tick the check box to confirm completion of HLB after clicking on "SYNC" icon button, then put your signature in the blank area, and finally click "SAVE". xi. Keep your mobile device safe, away from any unauthorised person and children during the field work.	i. Don't use any type of cloning App such as Parallel Spaces/ Dual Apps/ APK files, etc. to use this App. It is illegal and unsafe. Data would not be synced with this technique and you may end up in re-doing the work due to data loss. ii. Don't uninstall the App under any circumstances. In case of any update, just update the App from Play Store/ App Store. iii. Do not change Registered Mobile Device. It may be changed only in extreme circumstances like device stolen, device broken, etc., with permission/approval of Charge Officer. iv. Don't share your user ID and password with anyone. v. Don't use another device for data entry while you have already registered on one device. vi. Don't handover your mobile to any unauthorized person or children during the entire Census exercise. vii. Do not share individual responses or allow inspection of Census records by any unauthorized persons other than those duly authorized in official capacity for Census, 2027. viii. Do not share PIN created for opening HLO App with anybody.

1. INTRODUCTION

The Census Organization welcomes you. You are privileged to have been chosen as an Enumerator/Supervisor for the Census of India 2027, which is a task of great national importance. We are assured that you will fulfil your obligations with utmost sincerity and devotion.

1.1 Historical Background

- 1.1.1 The Indian Census, with its rich tradition, is widely regarded as one of the best in the world and stands among the largest administrative exercises globally. Census comes under the Union List [Article 246] at serial number 69 of the Seventh Schedule of the Constitution of India and Census Act, 1948 forms the legal basis for its conduct.
- 1.1.2 The first Census in India was conducted in the year 1872. This was conducted at different points of time in different parts of the country. In 1881, a Census was taken for the entire country simultaneously. Since then, Census has been conducted every ten years, without a break till Census 2011. However, Census of India 2021 could not be conducted as per regular schedule due to Covid-19 pandemic. The Census of India 2027 will be the 16th in this series since 1872 and the 8th after Independence.
- 1.1.3 The great historical tradition of conducting the Census has been maintained through the missionary zeal and dedication of Enumerators and Supervisors like you. Participation in the Census by you and the people of India is indeed a true reflection of the national spirit of unity in diversity.

1.2 Objective of conducting a Census

- 1.2.1 The Indian Census is the most credible source of information on Demography (Population characteristics), Economic Activity, Literacy and Education, Housing & Household Amenities, Urbanization, Fertility, Scheduled Castes and Scheduled Tribes, Language, Religion, Migration, Disability and many other socio-cultural and demographic data.
- 1.2.2 Census provides grass root level information for planning of various welfare schemes for the benefit of the people of India. On the basis of information collected through the Census, number of seats in Parliamentary/Assembly Constituencies, Panchayats and other Local Bodies are demarcated. Thus, the Enumerators are not merely collecting information; they are actually a part of a massive nation-building activity.
- 1.2.3 The Phase I, i.e., Houselisting and Housing Census has immense utility as it provides comprehensive data on the conditions of human settlements, housing deficit and consequently the housing requirement to be taken care

of in the formulation of housing policies. This will also provide a wide range of data/information on amenities and assets available to the Households needed by various departments of the Union and State Governments and other non-governmental agencies for development and planning. This would also provide the frame for Population Enumeration.

- 1.2.4 Population Enumeration conducted as Phase II, provides valuable information about every individual in the country at a given point of time. The Census data are frequently required to develop sound policies and programmes aimed at fostering the welfare of the country and its people. This data source has become indispensable for effective and efficient public administration besides serving the needs of scholars, businessmen, industrialists, planners and electoral authorities etc. One of the essential features of Population Enumeration is that each person is enumerated and her/his individual particulars are collected at a well-defined point of time termed as reference date and moment.
- 1.2.5 The data collected in Census on various parameters i.e. housing, demographic, socio-economic, data on migration and fertility characteristics, being vast repository of information is essential for national planning and development. For building a Viksit Bharat (Developed India), reliable Census data forms the basis for evidence-based policy making as it helps policymakers to design/budget targeted schemes/welfare programmes, better allocation/ distribution of resources and in infrastructure and urban planning. Apart from this, it forms the basis of social sector development for crafting inclusive policies for marginalized groups and monitor progress toward social equity particularly disabled, SC/ST and gender related issues. Census data helps in designing job-creation programs, skilling initiatives and industrial development strategies resulting in economic planning and employment generation. It is also used in disaster management and public health purposes in identifying vulnerable populations, plan emergency responses, vaccination drives and health infrastructure etc. Census is one of the most important tools to overall evaluate and monitor progress toward national goals i.e. whether government schemes are achieving their intended objectives for a Viksit Bharat.

1.3 Census of India 2027

- 1.3.1 The Census of India 2027 will be conducted in two phases, namely (i) Houselisting and Housing Census and (ii) Population Enumeration. During the first phase, the Buildings, Census Houses and Households will be identified, and systematically listed within one month period between April to September, 2026, depending on local conditions and the timelines set by the respective State/Union Territory administrations, as published in the State Gazette.

- 1.3.2 Apart from listing of building and houses, some useful data on the amenities available to the households and assets possessed by them are also collected for assessing the condition of human settlements, housing deficits etc.
- 1.3.3 The field work of the second phase (Population Enumeration) in entire country (except snow-bound areas) will be carried out during February-March, 2027 when each person is enumerated and her/his individual particulars are collected. In snow-bound areas, this will be carried out during September-October, 2026.
- 1.3.4 For the first time, the Census data will be collected using Mobile Application '**Census 2027-HLO**' during the first phase. This Mobile App is compatible with smartphones of both Android/iOS platform versions of 11.0 of Android and 15.0 of iOS and above. Minimum 4 GB RAM and 8 GB storage is required. Additionally, PDF viewer should be available in mobile phone for viewing maps.
- 1.3.5 The HLO Mobile App for Census purpose has been devised to be simple, convenient and user friendly to ensure maximum use by all the Enumerators and Supervisors. As the Enumerators need not carry heavy schedules to the field, which in turn would provide higher mobility to Enumerator in the field. The App also provides fetching facility of self-enumerated Census house records and edits them as needed. The digital data collection shall further reduce the burden of preparing working sheets, abstracts, and duplication of other associated work thereby saving the time and efforts.
- 1.3.6 For the first time in Census 2027, the Self-Enumeration method is also being introduced. This approach enables individuals to submit their own information through web portal. This will facilitate those individuals and households more who are generally away from their residence for the entire day owing to work, business, or other professional engagements. The Enumerator needs to check the self-enumerated data before submitting.

Summary

- Census is a Constitutional and statutory activity conducted under Article 246 (Union List) and the Census Act, 1948.
- Census 2027 is the 16th Census since 1872 and the 8th after Independence; Enumerators and Supervisors are its backbone.
- Census data forms the foundation for planning, welfare schemes, resource allocation, and delimitation of constituencies.
- Census 2027 will be conducted in two phases:
 - Phase I – Houselisting & Housing Census (2026) and
 - Phase II – Population Enumeration (2027).

- Houselisting Census provides vital information on housing conditions, amenities, assets, and creates the frame for population enumeration.
- Population Enumeration records individual particulars of every person at a fixed reference date and time.
- Census 2027 marks a major shift to digital data collection using the “Census 2027-HLO” mobile app.
- Self-Enumeration is introduced for the first time; The Enumerator needs to check the self-enumerated data before submitting.

2. ROLES AND RESPONSIBILITIES OF ENUMERATORS AND SUPERVISORS

General Instructions for Enumerators and Supervisors

- 2.1** It is very important and essential to become thoroughly familiar with the basic instructions before commencing fieldwork for data collection in the Houselisting & Housing Census. The method of data collection through the Mobile App, along with the concepts and their detailed illustrations provided in this Users' Manual, is designed to ensure data collection with precision within stipulated time. It is absolutely essential for you to become thoroughly familiar with these instructions. The success of the Houselisting & Housing Census is dependent on a thorough understanding of the concepts, definitions and instructions and their faithful application at the time of data collection. In case of any doubt, do not hesitate to seek clarification during the training classes and later, from your Supervisor or Charge Officer.
- 2.2** **Your responsibilities as an Enumerator/ Supervisor are great that you have to fulfil with a sense of pride and devotion to duty.** Before undertaking the work of Houselisting & Housing Census, you are expected to establish proper rapport with the people of your assigned area by contacting elderly and prominent persons and explaining them the purpose of your visit. You have been issued an Appointment Letter and an Identity Card. You should always display your Identity Card whenever you go for enumeration work. When you visit any Household, never rush through the questions. Always approach the respondent with a smile and proper salutation. Explain briefly the objective of your visit and then proceed with your brief introduction. Your friendly appearance, courtesy and a few well-chosen words can help build trust with the respondent, encouraging them to answer all your questions willingly and accurately. Please assure the respondent that the information collected during the Census is strictly confidential under provisions of Census Act, 1948 and cannot be shared with anyone.
- 2.3** To ensure wilful co-operation of the vast majority of population during the Houselisting & Housing Census, you must be in a position to explain to the respondents the use of the data collected through Census. The information collected during the Census is used to provide statistics which do not permit identification of any individual or household. Besides, confidentiality is maintained during processing of the data collected through Census and it is an offence for anyone to disclose the particulars of any identified individual. Even after enactment of the Right to Information Act, 2005, the individual level information cannot be disclosed under RTI Act, 2005 (See 8(1)(j)).
- 2.4. Duties as an Enumerator**
- In order to ensure complete coverage, it would be necessary to locate and identify each and every house and structure in your Houselisting Block. Therefore, it would be essential for you to go round the Houselisting Block assigned and become familiar with its features. The main duties of an Enumerator before, during and after conduct of the HLO are detailed below:

2.4.1 Duties before HLO:

- i. Attend the training classes, study the Houselisting questions and the manual carefully and understand them thoroughly. If any part of instructions is not clear, ask your trainer for clarification. Perform hands-on exercises to gain confidence in using the App and clear all the doubts from time to time.
- ii. Obtain the material, such as Users' Manuals, list of Scheduled Castes and Scheduled Tribes, Kit, stationery, etc. needed for Houselisting before you leave the training centre at the end of the last training session.
- iii. Download and Install HLO Mobile App
- iv. During the practical training sessions, familiarize with the operational and functional procedures of the Mobile App.
- v. Ask for Self Enumeration IDs from households and verify the response filled by them" or suitable wording. Please note that SE IDs will not be downloaded by enumerator rather it is automatically downloaded when user signs in the HLO App.

2.4.2 Duties during HLO

- i. Go round the Houselisting Block along with your Supervisor and identify its boundaries and other landmarks.
- ii. Assign number to each Building (where no building number has been provided by the local authority) with marker pen and write number of Census Houses in it within bracket
- iii. Download the pdf copy of Map pertaining to assigned HLB(s) available in your HLO App and use this map as reference to draw Layout Map showing all buildings/structures, important landmarks, all Roads, Streets and Lanes.
- iv. Visit each and every house without exception and enter the Houselisting data on HLO Mobile App.
- v. Ask for Self Enumeration IDs from households and verify the response filled by them" or suitable wording. Please note that SE IDs will be automatically downloaded when enumerator/supervisor signs in the HLO App.
- vi. Review the summary for each house/household before syncing to ensure the information is accurate and complete.
- vii. Collect the SE reference IDs of households who have done Self-Enumeration and review the data to accept or edit, if necessary and submit.

- viii. After collecting the data for every 5-6 houses/households, sync the data to ensure uploading of data on central server, to prevent data loss.

2.4.3 Duties after HLO

- i. First of all, ensure that the entire area assigned to you is covered by visiting all the Buildings, Census Houses and the Households falling within your Houselisting Block.
- ii. After ensuring that all data collected during Houselisting has been synced, mark the completion of HLB in the HLO App and inform your Supervisor about the completion of your work.
- iii. It is mandatory to collect data on mobile. However, if, due to extremely unavoidable circumstances, data collection is carried out in paper mode, then enumerator needs to ensure that the data entry is done on the web portal at Charge Officer's office for submission of data within the prescribed date.

2.5. Duties as a Supervisor

2.5.1 The Supervisor shall follow duties specified in para 2.4.1 and perform the following as well:

- i. Ensure that all the Enumerators attached to her/him attend training and receive materials at the end of training
- ii. Go around each of the assigned Houselisting Blocks within your Supervisory Circle along with your Enumerators and identify its boundaries and other landmarks as per the information provided by the Charge Officer.
- iii. If there are any changes in the HLB boundaries after ground verification, please inform to Charge Officer for necessary changes. Ensure that the revised pdf copy of Map pertaining to modified HLB is downloaded and used for field activities.
- iv. Report any coverage issues to the concerned Enumerator for completing the tasks.
- v. Preview and check the Houselisting data collected and synched by all your Enumerators through your own mobile using HLO Supervisor App login instantly or on Enumerator's mobile as per convenience.
- vi. Move independently in each HLB time to time to check the work of all the attached Enumerators and simultaneously ensure that no area between HLBs is left out.
- vii. Ensure that the entire area assigned to each HLB is fully covered by the respective Enumerators and all collected data has been synced and HLB marked as completed by them.

- viii. Use the downloaded pdf copy of Maps pertaining to your Supervisory Circle from HLO App as reference to draw Layout Map of Supervisory Circle showing all HLBs.
- ix. If data collection is carried out in paper mode by any of your Enumerator, then ensure that data entry is completed on the web portal at Charge Officer's office within the prescribed date.
- x. Attend to all other jobs assigned from time to time by the Charge Officer
- xi. Specially check the tagged Self-Enumeration data which have been edited by the Enumerator.

2.6. Honorarium/Awards

2.6.1 Though, it is a legal obligation, the work done by the Enumerator/ Supervisor is duly rewarded and recognized. All the Enumerators and Supervisors who are engaged in this great national task will be paid a suitable honorarium as decided by the Government of India.

Summary	
Enumerator	Supervisor
Attend training, study the Users' Manual, and gain hands-on familiarity with the HLO Mobile App.	Attend training and ensure all attached Enumerators also attend training and receive required materials.
Visit every building, Census House, and household in the assigned Houselisting Block (HLB) without omission.	Verify HLB boundaries and landmarks on ground and report changes to the Charge Officer.
Number buildings (where not numbered) and prepare HLB layout map using the App-provided map.	Prepare Supervisory Circle layout map covering all HLBs.
Collect Houselisting data using the HLO App, verify Self-Enumeration IDs, review entries, and sync data frequently.	Monitor, preview, and check Enumerator data through Supervisor App and field inspections.
Ensure full coverage, sync all data, mark HLB as completed in the App, and inform the Supervisor.	Ensure no gaps or overlaps between HLBs and that all HLBs are fully covered and marked completed.
Use paper mode only in unavoidable cases and ensure timely data entry on the web portal.	Ensure timely web-portal data entry for any paper-mode data collected by Enumerators.

- Thoroughly understand Census concepts, definitions, and instructions and seek clarification whenever in doubt.
- Display Identity Card during fieldwork and maintain courteous, professional conduct.
- Establish rapport with respondents and explain the purpose and importance of Census.
- Assure respondents that Census information is strictly confidential under the Census Act, 1948 and not disclosable under the RTI Act, 2005.
- Follow digital mode as the primary method of data collection; ensure data accuracy and completeness.
- Perform Census duties with accuracy, neutrality, sincerity, and a strong sense of national service.
- Census work is a legal obligation and a nationally recognised task, eligible for honorarium/awards as decided by Government of India.

3. LEGAL PROVISIONS AND THE RIGHTS OF ENUMERATORS AND SUPERVISORS

3.1 The Census Act, 1948

- 3.1.1 The duties that the Enumerators or Supervisors are asked to perform, are very important and challenging. The role they are about to perform has the sanction of Law. Their Appointment Letters are issued under the Census Act, 1948. The law, while providing certain protection to them in discharge of their legitimate duties, also provides for penalties in case these duties are not performed in a proper manner. We have no doubt that all will complete the Census work thoroughly and satisfactorily with pride and devotion within the allotted time schedule. Let us now look at some of the important legal provisions that govern the conduct of Census.
- 3.1.2 Rights of an Enumerator/Supervisor under Sections 8 and 9 of the Census Act, 1948 - The Enumerator/Supervisor, for the purpose of Census, has the right to enter the house, enclosure, vessel or any other place occupied by the Household, having regard to local customs, to paint or affix numbers on the Building/Census House as may be necessary, to ask all such questions of the Houselisting and Housing Census and to obtain the answers from the respondents.
- 3.1.3 Filling-up of census schedule through self-enumeration under Section 6D of Census (Amendment) Rules, 2022- "Self-Enumeration" means filling-up, completion and submission of census schedule by respondents themselves. Without prejudice to any other provisions of these rules, a person may fill-up, complete and submit the census schedule through self-enumeration.
- 3.1.4 Records of Census not open to inspection nor admissible in evidence [Section 15] No person has the right to inspect any book, register or any magnetic or electronic record made by a Census officer and any filled-in Census Schedules and the entries made under these documents will not be admissible as evidence in any civil proceeding.
- 3.1.5 Protection of service interests of members of Census staff [Section 15A] - The period spent by the Enumerator/Supervisor on Census duty shall be deemed to be the duty under his lending employer.
- 3.1.6 Protection of action taken in good faith [Section 15B] - For anything which is done or intended to be done by the Enumerator/Supervisor in good faith under the Census Act or the rules made thereunder, no suit, prosecution or other legal proceeding shall lie against him.
- 3.1.7 Penalties under the Act if the Enumerator/Supervisor fails to perform the duties - The appointment of a person as an Enumerator/Supervisor under

the Census Act, 1948 automatically casts upon such person a duty to conduct the assigned Census operations with due diligence. Failure to discharge the entrusted duties as per the guidelines results in imposing of penalties.

3.2 Extracts of relevant Sections of the Census Act, 1948 are given in the Annexure-1.

3.3 The services of Teachers can be used for works of national importance like Census. Section 27 of The Right of Children to Free and Compulsory Primary Education Act, 2009, which may be read as **“No teacher shall be deployed for any non-educational purpose other than the decennial population Census, disaster relief duties or duties relating to elections to the local authority or the State Legislatures or Parliament, as the case may be”** overrides all the existing judgments, whatsoever, on the subject matter of appointment of teachers for performing Census related duties.

Summary
• Census operations are conducted under the Census Act, 1948, and all Appointment Letters issued to Enumerators and Supervisors have full legal sanction. • Enumerators/Supervisors have the right to enter households, affix numbers, and ask Census questions (Sections 8 & 9). • Self-Enumeration is legally permitted under Section 6D of the Census (Amendment) Rules, 2022. • Census records and data are strictly confidential and not open to inspection or court evidence (Section 15). • Census duty period is treated as official duty by the lending employer (Section 15A). • Actions taken in good faith are legally protected (Section 15B). • Non-performance or negligence in Census duties may attract penalties. • Teachers can be lawfully deployed for Census work under the RTE Act, 2009. • Census duties are both a legal obligation and a nationally significant responsibility, and are duly recognized through honorarium and awards as decided by the Government of India.

4. NUMBERING OF BUILDINGS, CENSUS HOUSES AND PREPARATION OF LAYOUT MAP

4.1 Introduction

As a field functionary of the Census 2027, it is important that you familiar with the basic concepts like Houselisting Block, Premises, Building, Census House, Household, Normal Household, Institutional Household, Layout Map, etc. This chapter includes the numbering of the Buildings and Census Houses and preparation of the Layout Map. Proper understanding of all these concepts and procedures would enable you to complete the work allotted to you without omission or duplication. The objective is to number and list out all the buildings/structures, which are used for different purposes like residential or otherwise.

4.1.1 Every Houselisting Block (HLB) you are assigned with is the foundation for Census operations. As Supervisor or Enumerator, before starting the collection of data, your task is to visit every area within your Block(s) and ensure that you have full understanding of the boundaries. This is to ensure that all Buildings and Census Houses/Households in them are covered without omission or duplication.

4.2 Concepts and Definitions

Houselisting Block (HLB):

4.2.1 'Houselisting Block' means a specific area allotted to the Enumerator for the purpose of carrying out Census Operations which includes, House Numbering, Houselisting and canvassing of HLO schedule. Please check that the number of the Houselisting Block allotted to you is clearly mentioned along with its location particulars in the Appointment Letter. In case of any doubt, please consult your Supervisor or Charge Officer (Tahsildar, SDM, BDO, Executive Officers of Municipalities, etc.).

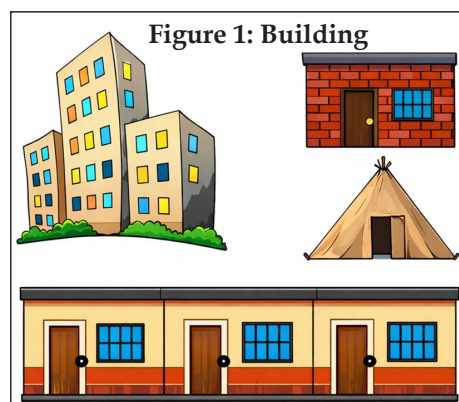

4.2.2 As an Enumerator, your first duty in the field is to identify the Houselisting Block area and familiarize with it. You should not omit any structure/Building falling within the area allotted to you. In a Houselisting Block or part of a Block, the pattern of housing may be such that the Buildings are scattered or located in clusters like Tribal thandas, or hamlets predominantly occupied by Scheduled Caste/Scheduled Tribe population or located in isolated parts like fields, boundaries of the village/Houselisting Block(s) along the side of a railway track or a canal/river/nala. If such areas are falling in the Block allotted to you, the same should be included in Layout Map. If you have any difficulty in identifying your Houselisting Block, contact your Supervisor or the Charge Officer.

Premises

- 4.2.3 Premises means Building along with the land and/or common places in case of apartments/ flats/multi-storey Buildings attached to it. A Building may not always have a compound wall or fencing. In such cases, the land or the common place as the case may be, that is available to the Household may be treated as 'Premises'.

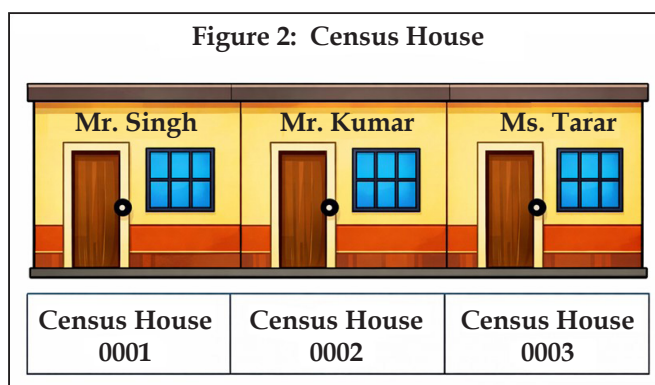

Building

- 4.2.4 A 'Building' is generally a single structure on the ground. Normally, a structure will have four walls and a roof. Sometimes it is made up of more than one structure which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work sheds, schools, places of entertainment, places of worship, godowns, stores, etc. It is also possible that Buildings which have more than one structure may be used for a combination of purposes such as residence-cum-shop, residence-cum-workshop, residence-cum-office, residence-cum-doctor's clinic, residence-cum-tuition centre, residence-cum-beauty parlour, etc. (Figure 1).

Census House

- 4.2.5 A 'Census House' is a Building or part of a Building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase etc. It may be occupied or vacant. It may be used for a residential or non-residential purpose or both.

- 4.2.6 If a Building has a number of Flats or Blocks/Wings, which are independent of one another having separate entrances of their own from the road or a common staircase or a common courtyard leading to a main gate, these will be considered as separate Census Houses. Some examples/ illustrations for

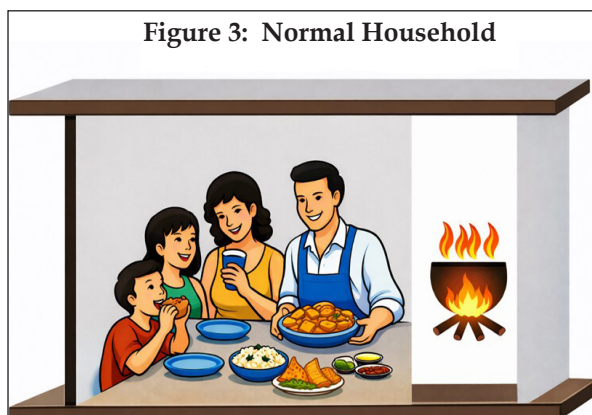

identification of Building and Census House have been given in para 4.2.15 to 4.2.27 of this chapter.

Household

- 4.2.7 A 'Household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. The persons in a Household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a Census House but do not take their meals from the common kitchen, then they will not collectively constitute a Household. Each such person should be treated as a separate Household. The important link in finding out, whether it is a Household or not, is a common kitchen. There may be one two or multi-member Households. You may come across three types of Households namely, i) Normal, ii) Institutional and iii) Houseless. **In Houselisting, only the Normal and Institutional Households are to be covered.**

Normal Household

- 4.2.8 'Normal Household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a Normal Household may be related or unrelated or a mix of both whereas in an Institutional Household the persons are unrelated.

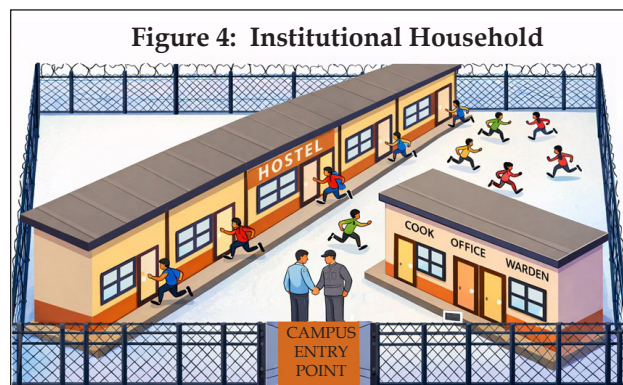

- 4.2.9 Sometimes, it may be difficult to apply the definition of Household strictly as given above. For example, a person living alone in a Census House, whether cooking meals or not, will have to be treated as a Household. Similarly, if husband and wife or a group of related persons are normally living together in a Census House but are getting cooked meals from outside due to some reason, then this will also constitute a Normal Household.

Remember: While covering isolated Buildings/Households, it may be kept in mind that the Household might have another residence in the main habitation but within the boundary of the same Houselisting Block. In such cases, that Household is to be enumerated at only one place where the Household normally resides during most part of the year.

Institutional Household

- 4.2.10 A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an 'Institutional Household' e.g. boarding

houses, messes, hostels, hotels, rescue homes, observation homes, beggars' homes, jails, ashrams, old age homes, children homes, orphanages, etc. In the adjacent figure, a Students Hostel is shown as an illustration.

- 4.2.11 If in a Building which is occupied by an Institutional Household, the families of the warden, peon and gardener might also be living in separate Census Houses and cooking for themselves separately, then each family will be treated as a separate Household and houses occupied by them will be treated as separate Census House. In this situation, there will be one Building, four Census Houses and four Households - one Institutional and three Normal.
- 4.2.12 You must have noticed that in certain cities and towns, especially in close proximity to Educational institutions, IT and other companies, Business centres, Corporations, etc., a number of housing units providing **Paying Guest (PG)** accommodation to students, trainees, employees, etc. have come up. The service provider/owner of such accommodation receives fixed monthly charges for lodging, meals and other facilities provided to the inmates. If a group of unrelated persons is found living and sharing a common kitchen in such Paying Guest accommodation, it will be considered as an Institutional Household only if such a PG accommodation is registered. If it is not registered, it may be treated as a Normal Household. If the inmates of the PG accommodation are not sharing meals from a common kitchen, then each such inmate should be treated as a separate Normal Household.
- 4.2.13 If a group of unrelated persons, sharing a common kitchen, is found living in a Census House which is not an institution, such a Household will not form an Institutional Household. The listing of such Households will be done like other Normal Households.

Houseless Households

- 4.2.14 Houseless Households are the Households which live in the open or roadside, pavements, in hume pipes, under fly-overs and staircase, or in the open in places of worship, mandaps, railway platforms, etc. Houseless Households are not to be covered in Houselisting phase. **These will be covered during the second phase i.e., Population Enumeration.**

Identification of Buildings and Census Houses:

- 4.2.15 A Building is generally a single structure on the ground having four walls

and a roof. A simple example of one a Building, one Census House is given in Figure 5.

Figure 5

**One Building,
One Census
House**

4.2.16 In some areas, the very nature of construction of houses is such that apparently there may not be any wall. For example, a conical roof almost touches the ground and an entrance is also provided and there will be no four walls as such. Such structures should also be treated as Buildings and Census Houses. An example is given in Figure 6.

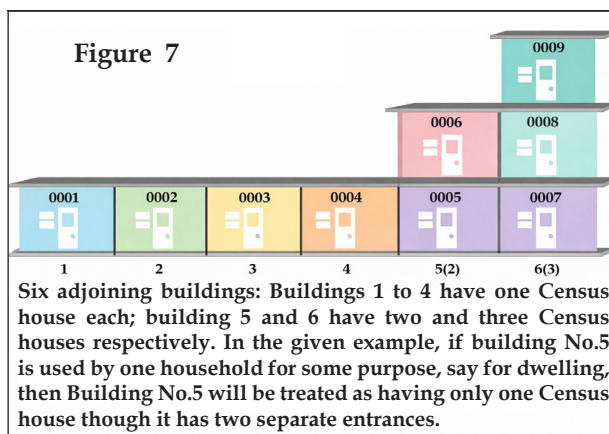

Figure 6

**Conical house;
One Building,
One Census
House**

4.2.17 Sometimes, a series of different Buildings may be found along a street that are joined with one another by common walls on either side looking like a continuous structure. These units are practically independent of one another and are likely to have been built at different times and owned and occupied by different households. In such cases, though the whole structure with all the adjoining units apparently appears to be one Building, but have separate entrance should be treated as a separate Building and given a separate number (Figure 7).

Figure 7

4.2.18 Refer to Figure 7 depicting six adjoining buildings. In large cities, one may come across multi-storied apartments. In these cases, while the structure looks like one Building, each Flat is owned/ occupied by different persons. In case of such multi-storied structures, having a number of Flats owned/occupied by different persons, the entire structure should be treated as one Building and each flat as a separate Census House (Figure 8).

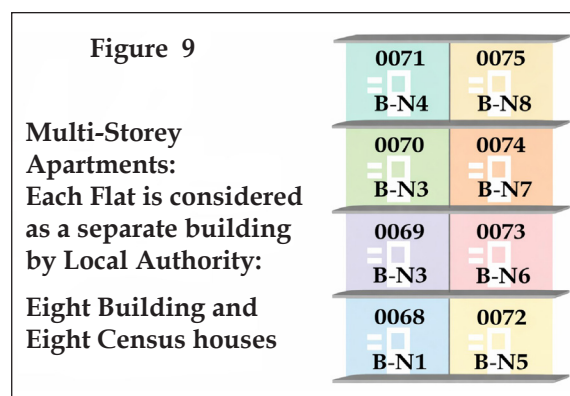

Figure 8

**Multi-Storey Apartments:
One Building with Eight
Census houses**

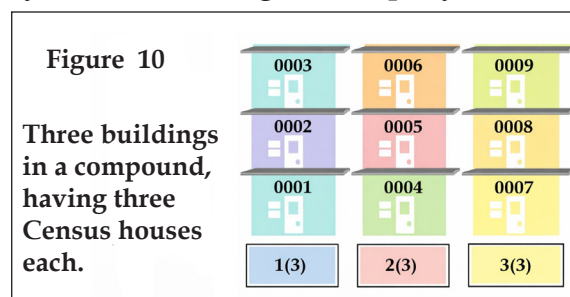

M1 (8)

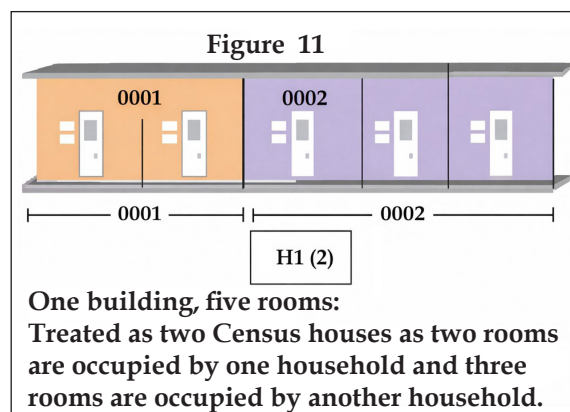

4.2.19 However, sometimes in metropolitan cities, the local authorities may have considered the Flats in a multi-storey apartment as separate Buildings and numbered them as such. You may treat each such Flat as a separate Building because this will avoid renumbering them (Figure 9).

4.2.20 You may come across cases where within an enclosed compound there may be separate Buildings owned by an undertaking or company or even Government, actually in occupation of different households. Each such Building should be reckoned as a separate Building. But if in any one of these Buildings there are flats in occupation of different Households, each such flat should be treated as a separate Census House (Figure 10).

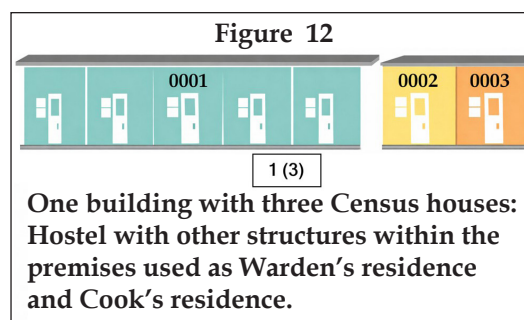

4.2.21 It may be difficult to apply the definition of Census House strictly in certain cases **wherein ownership/possession and singleness of use along with separate entrance** have to be considered **simultaneously**. For example, in an Urban area, a Building has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, all five rooms are to be treated as five Census Houses. If all these five rooms are occupied by a single Household, it is not realistic to treat them as five Census Houses. In such a case, singleness of use of these rooms should be considered and the entire Building should be treated as one Census House. On the other hand, if two independent Households occupy these five rooms, the first Household living in 2 rooms and the second Household occupying 3 rooms, then considering the use the first two rooms together should be treated as one Census House and the remaining rooms as another Census House. But if each room is occupied by 5 independent Households, then each room should be treated as a separate Census House (Figure 11).

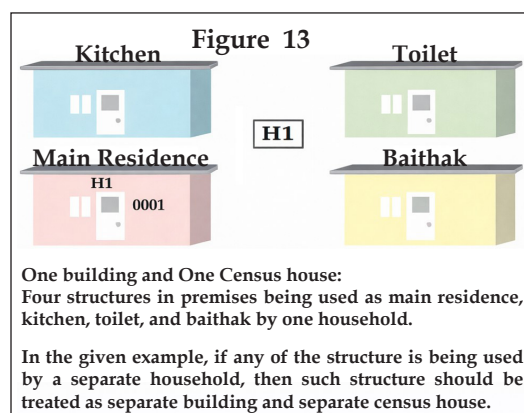

4.2.22 In case of hostels, hotels, etc., even if the door of each room in which an

inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/hotel Building should be treated as one Census House. But if such hostels/hotels have some rooms, out-houses or other structures used for different purposes then each such structure located within the premises or attached to the main hostel/hotel should be treated as a separate Census House and will be given separate Census House numbers (Figure 12).

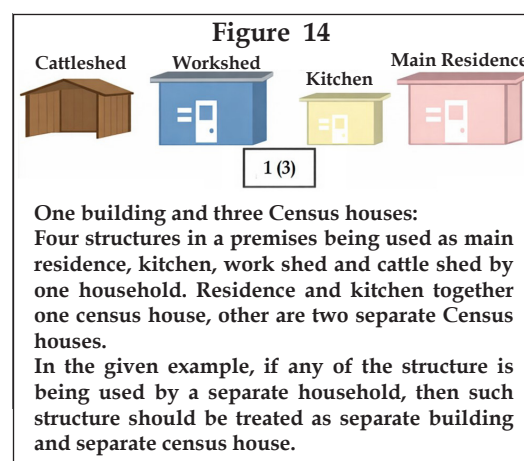

4.2.23 In some parts of the country, the pattern of habitation is such that a group of huts/structures located in a premise, whether enclosed or not, is occupied by one Household. While the main residence may be located in one hut/structure, other huts/structures may be used for sleeping, as a kitchen, bath room or baithak. Though each of the huts/structures is a separate structure, they form a single housing unit and therefore, have to be treated collectively as one Building and one Census House (Figure 13).

4.2.24 However, if there are also other huts in the premises used for other purposes and not as part of the Household's residence such as, cattle shed, work-shed, etc. these should be treated as separate Census Houses (Figure 14).

4.2.25 On the other hand, in Urban areas, you may come across a situation where a group of structures are located in a premise, whether enclosed or not, belonging to the same person e.g. the main house, the servant's quarter, the garage, etc. Only one Building number should be given for this compound and for each of the constituent unit, a separate Census House number will be given provided they satisfy the definition of Census House (Figures 15 & 16).

4.2.26 It is also possible that a Household uses another structure, e.g. a baithak,

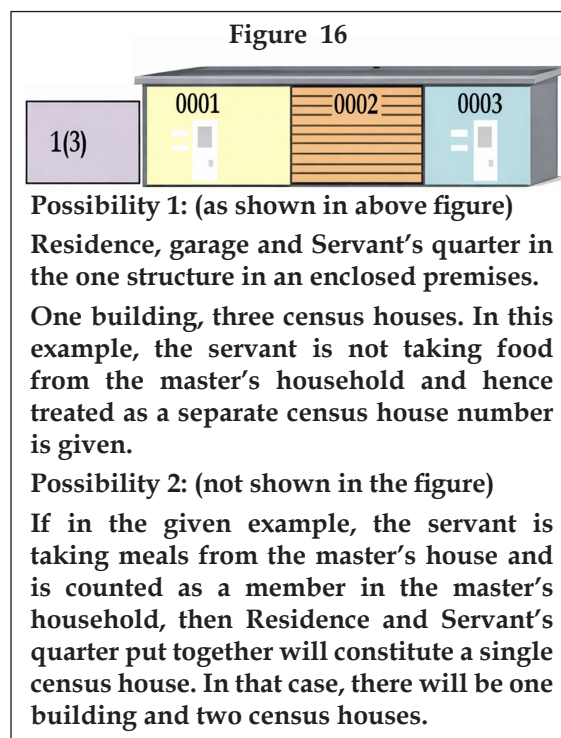

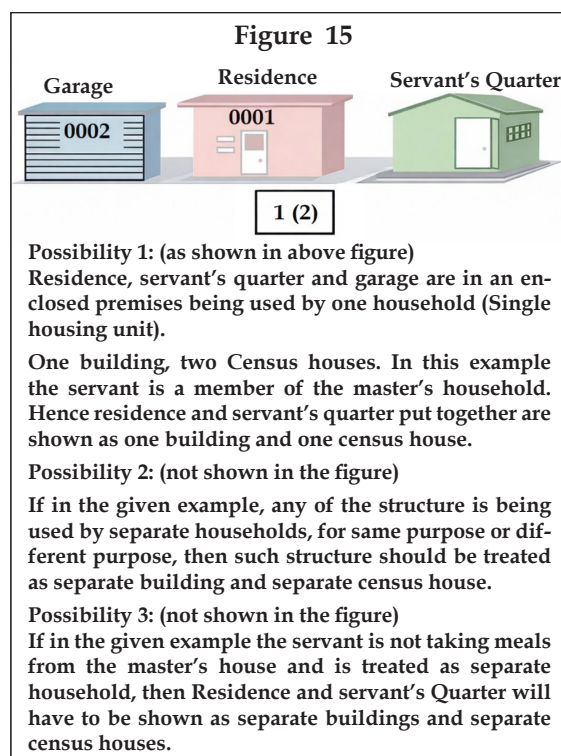

separated from the main residence by some distance or by other structures or by a road but within the same Houselisting Block. In such cases, it becomes necessary to treat that separate structure used as 'baithak' as a separate Building/ Census House.

4.2.27 It is usual to find in municipal towns and cities that every site whether built upon or not is numbered by the municipal authorities on property basis. Such open sites, even if these are enclosed by a compound wall, should not be listed for Census purpose. **Only cases where a structure with roof has come up should be treated as a Building and numbered accordingly.**

4.2.28 The objective of Houselisting is to identify any structure where human beings can live. Therefore, it is important to list out structures such as Pump houses, temples, grain stores, temporary huts built in the fields and other similar structures in which people can reside. These must also be treated as Buildings and numbered appropriately. **Structures need not be numbered if they are so small that no person can live in them.**

4.3 Guidelines for House Numbering:

4.3.1 For the purpose of Census, House Numbering means ensuring that each and every Building and the Census House located in your Houselisting Block bears a systematically assigned number and the Building number and number of Census Houses in the Building is shown on the Layout Map. It may please be noted that only numerals as indicated in the Schedule should be used for marking Building/ Census House numbers.

(A) Assigning number to Buildings:

4.3.2 While allotting numbers to Buildings in your Houselisting Block, you are likely to come across three situations:

- i) where Buildings are numbered systematically by the municipal or local authorities;
- ii) where numbers to open sites are given on property basis but there are number of sites where the Buildings have not so far been constructed or where Building numbers are existing but incomplete and not systematic, and
- iii) no numbering to Buildings exists.

In the first case, numbering of Buildings given by the municipal or local authorities is to be adopted. However, in respect of new Buildings which have come up after the Buildings were numbered, they should be given a sub-number/new number. For Example, if a Building is found un-numbered or a new Building has come up between Buildings numbered 10 and 11, the same should be numbered as 10/1 meaning thereby that a separate Building has come up after Building number 10. In case the numbering given by the local authorities ends with No. 120 then a new number '121', in continuation of the numbering given by the local authorities, may be given. In the second and third situations, you are advised to give Census numbers to Buildings prefixed by CN.

Some specific cases:

- (i) **Houselisting Block consists of a number of streets:** The Buildings in various streets should be numbered continuously. Streets should be taken in uniform order from North-West to South-East. The best way of numbering the Buildings is to continue with one consecutive serial on one side of the street and complete numbering on that side before crossing over to the end of the other side of the street and continuing with the same series, stopping finally opposite to where the first number was allotted.
- (ii) If in a Houselisting Block or part of a Houselisting Block, **the Buildings are scattered or located in clusters or located in isolated parts like fields, boundaries of Village/Houselisting Block, along the side of a railway track or a canal/river/nala**, then to the extent possible, Building numbers should be assigned by following the method described at (i) above. However, if it is not possible to follow the procedure laid down at (i) above, it should be ensured that all the Buildings are numbered and the direction in which the Building numbers are assigned should be indicated by arrow marks on the Layout Map wherever the number jumps.
- (iii) In an **Urban Houselisting Block**, the numbering will generally run along the axis of street and not in any arbitrary geographical direction.
- (iv) A **Building under construction**, the roof of which has been completed, a number should be given in the serial.

- (v) In vegetable markets/mandis, there are shops, which have common roof but no walls on 4 sides. In some places, only poles are erected with tarpaulin/ plastic on top or with concrete roof and the floors are about 3 feet high. All such places may also be identified as Buildings and numbered accordingly irrespective of these being used for selling or also for sleep at night by the shopkeepers.

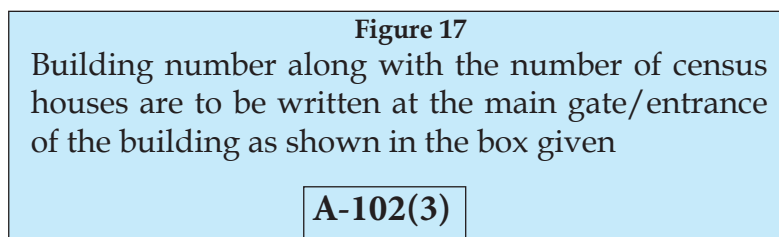

(B) Assigning number to Census Houses:

- 4.3.3 Each Census House will get automatic increment number while collecting data in HLO mobile App. Please remember that the Census House number may be different from the Building number.

Examples of assigning Census House numbers:

Building numbers as assigned by the Municipality/Local Body etc.	Number of Census Houses	Census House Numbers
A-101	2	0001, 0002
A-102	3	0003, 0004, 0005
A-103	2	0006, 0007

You have to write numbers with long lasting material supplied to you at the prominent places on the Buildings and Census Houses within bracket. For example, Building number A-102 has three Census Houses viz. 0003, 0004 and 0005, then at prominent place on that Building and Census Houses, it should be shown as follows:

- 4.3.4 If a **new Building is found after the house numbering has been completed or in the midst of Buildings already numbered**, it should be given a new number which may bear a sub-number. The Census Houses thus found will be given the numbers next to the number of last Census House.

For example, if 0153 is the number given to last Census House and a Building is found un-numbered or a new Building has come up between Building number 10 and 11 having 2 Census Houses, the Building should be numbered as 10/1 and the Census Houses will be given numbers 0154 and 0155 respectively as shown in the table below. 10/1 would mean here that a separate Building that has come up after Building number 10.

Building Number	Number of Census Houses	Census House Number
10/1	2	0154
		0155

4.4 Preparation of Layout Map:

- 4.4.1 Before going to field for identifying your Houselisting Block, you should ensure that you are in possession of HLB Map provided by Charge Officer along with Appointment Letter which contains full Location Particulars like Name of the State/UT, Name of the District, Name of the Tahsil/ Taluk/ Development Block/Circle/Mandal etc., Name of the Town/Village, the Ward Code (in case of urban areas) and Houselisting Block Number. Normally, these particulars would be available in the Appointment Order issued to you by the Charge Officer.
- 4.4.2 **The Layout Map** that you shall be prepared will be a free-hand drawing, showing all buildings/structures along with number of Census Houses, important Landmarks, all Roads, Streets and Lanes.

Important: Though, the Layout Maps prepared are free-hand drawings, these are extremely useful in Disaster Management and various surveys done by different Government Agencies. Hence, due care must be taken while preparing these maps.

4.4.3 Guidelines for preparing the Layout Map:

- The objective of preparing Layout Map is to ensure complete coverage of the area assigned to the Enumerator, hence the **Layout Map should depict all Buildings/structures** used for different purposes such as residential, commercial, vacant houses, etc., including fields, empty spaces, etc.
- In this map, Enumerator has to show clearly the boundaries of the Houselisting Block and important features and landmarks such as roads, railway lines, hills, rivers, ponds, important Buildings such as school, hospitals/dispensary, post office, places of worship, panchayat ghar, town hall, court Building, shopping mall, large office Building, hotel, etc. Suitable symbols given in the Legend available on the left side of the Layout map shall be used to depict these features.
- You also have to draw different streets and lanes and mark structures in the Map. If these streets/lanes are having name given by local authorities, it would be better to show the same on the Layout Map. By doing so, you will become thoroughly familiar with the area of the Houselisting Block assigned to you.
- **In case of bigger villages having more than one Houselisting Block**, the concerned Supervisor will ensure that boundaries of each Houselisting Block are clearly demarcated.
- The Layout Map should clearly indicate the numbers of neighbouring Houselisting Blocks and name of Villages/Town as the case may be. The main purpose is to ensure that no part or cluster of houses is left out from the Houselisting. At the same time, no part or cluster of houses should be accounted for in two Houselisting Blocks.

- **In forest villages, there may be clusters of habitation in different parts of the forest.** The name of the habitation cluster, if any, should be written. It would be also necessary to mark any nearby permanent feature such as a stream, hill, road, etc., to identify the cluster as it is likely that some of the tribal habitations may change their locations now and then. This is to ensure that all habitations in the forest areas are covered in the Houselisting.
- **In the case of estates, plantations, etc.,** it would be advisable to contact and find out from the estate or plantation authorities about the boundaries of the village or area allotted to you. You should then visit the area and draw the Layout Map accordingly.
- It has been found from experience that the boundaries of towns are sometimes loosely defined and not properly demarcated giving rise to several doubts regarding the areas lying on the outskirts of towns. It is important that the map should clearly indicate the boundaries by means of definite survey numbers and also other permanent features.
- Sometimes, one side of the road may fall within the town limits and the other side gets excluded as it may be outside the defined boundary of the town. All these points should be carefully verified on the ground before the maps are certified to be correct by the supervising authorities.
- Cases of sub-urban growth adjoining the limits of a town and such cases as one side of a street falling outside the limit of a town should be brought to the notice of the superior officers who will have to ensure that such built-up areas are properly accounted for within the administrative unit in which they fall.

Important Note

- **If you have been assigned more than one Houselisting Block, the Layout Map for each Houselisting Block would be prepared separately. Similarly, the other records of each Houselisting Block will also be prepared separately.**
- The Layout Map will have to be prepared in duplicate for each Rural and Urban Houselisting Block.
- The lines dividing two different Houselisting Blocks should be clearly demarcated. Such dividing lines should follow some natural boundaries wherever possible and you should also indicate the survey numbers that fall on either side of the dividing line or the name(s) of the owner(s) of the land(s) or the name of the property, etc., to indicate the Block's boundary line.
- For those Houselisting Blocks which already have a satisfactory house numbering system, you should adopt the same for preparation of Layout Map and assign the same Building numbers on the Layout Map.
- If there is no proper house numbering system in the Houselisting Block, you will be required to assign continuous numbers to the Buildings and write the same in the Layout Map of respective Houselisting Block.

Showing Pucca, Kutcha Buildings with Numbers and number of Census Houses in the Layout Map:

4.4.4 In the Layout Map, every single Building must be shown. The idea behind depicting each Building on the Layout Map is to identify each type of Building by showing Pucca and Kutcha structure denoted by a particular box described hereinafter.

-  - Pucca Building, whether wholly or partly residential
-  - Pucca Building, wholly non-residential
-  - Kutcha Building, whether wholly or partly residential
-  - Kutcha Building, wholly non-residential.

4.4.5 For the purpose of preparation of Layout Map, a **Pucca Building** may be treated as one which has its walls and roof made of the following materials:

Wall material: Stones (duly packed with lime or cement mortar), G.I./metal/ asbestos sheets, Burnt bricks, Cement bricks, Concrete, timber etc.

Roof material: Machine-made tiles, Cement tiles, Burnt bricks, Cement bricks, Stones, Slate, G.I./Metal/ Asbestos sheets, Concrete, timber etc.

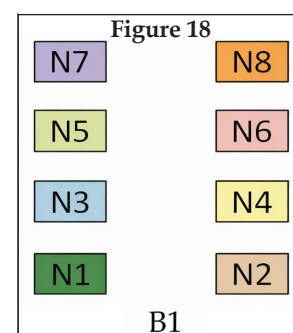

4.4.6 Buildings, the walls and/or roof of which are predominantly made of materials other than those mentioned above such as unburnt bricks, bamboos, mud, grass, reeds, thatch, plastic/ polythene, loosely packed stone, etc. may be treated as **Kutcha Buildings**.

4.4.7 In the blank template provided for Layout Map preparation, draw all buildings (use square/triangle symbols as given in para 4.4.4) and write the building number. In case, systematic building numbers are not available, assign temporary building numbers as indicated in para 4.3.2. You have to ensure that all buildings/structures indicated in the map are systematically numbered. If the Building has more than one Census House, the number of Census Houses comprising that Building will be shown in brackets just below the appropriate square/triangle of that Building on the map.

4.4.8 Example of showing Building number and number of Census Houses in the Layout Map

Building number	Type of Building	Use	Number of Census Houses	To be shown as
9	Pucca	Residential	2	 (2)
10	Pucca	Non-residential	1	
15	Kutcha	Residential	3	 (3)
6	Kutcha	Non-residential	1	

- 4.4.9 To understand the sequence of building numbering on the Layout Map, draw arrow marks at convenient intervals, especially where the Building number jumps, to indicate the direction in which the Building numbers run. This is particularly important when streets cut across one another and the Building numbering series along a street get interrupted.
- 4.4.10 It will be of advantage, if the numbers for a group of Buildings in one locality are roughly marked in pencil on the Layout Map before moving to another group of Buildings or locality within that Houselisting Block. This must be later verified with the actual situation on the ground to see if the order of numbering given in the Layout Map is as per the guidelines given in the preceding paragraphs or any change is needed.
- 4.4.11 If a new Building either Pucca or Kutcha is found in the midst of Buildings already numbered, please follow the instructions given in para 4.3.1.
- 4.4.12 However, sometimes Municipality or Local Bodies may have numbered each flat in a multi-storey Building. In this case, you may treat each flat as separate Building and separate Census House (Please refer Figure 9 para 4.2.19). In the Layout Map, the entire structure (Building with all flats) may be drawn as a big square/rectangle box and each flat inside may be shown separately as smaller squares inside that big square/rectangle box. Building number may be written on each small square representing flats. These small squares will be hatched in case of wholly non-residential use of the flat.

Important Note

You will be provided link in HLO app, to download pdf copy of the HLB showing HLB boundaries carved by the Charge Officer. In the blank template of Layout Map given to you

- a) draw the shape of the HLB boundary as per the downloaded HLB map and
- b) show all details as mentioned above within that boundary.

- 4.4.13 Specimen of pdf copy showing HLB boundaries carved by Charge Officer (which can be downloaded from HLO App) and notional Layout Map are given at the end of this chapter at **Annexure-4.1** and **Annexure-4.2**, respectively.
- 4.4.14 Use the downloaded HLB Map from HLO App and draw the Layout Map by following the steps given below.
- a) **Understand the HLB Map:** Carefully examine the downloaded **HLB Map** from the **HLO App** to understand the overall Layout of the HLB area. Note that **North direction is always oriented at the top** of the map.

- b) **Familiarisation of HLB Areas:** Go around the entire HLB area to gain a clear understanding of the Layout, access routes, buildings, and important landmarks.
- c) **Draw roads and physical Features:** Based on the downloaded HLB Map and field observations, draw all **roads, streets, lanes, and access paths**. Clearly mark important **natural and physical features** (such as canals, drains, open areas, water bodies, railway lines, etc.) present within the HLB area.
- d) **Mark Buildings and Important Landmarks:** Starting from the **north-west corner and moving systematically towards the south-east corner**, plot all buildings according to their **type and use** (e.g. Pucca/Kutchra, Residential/Non-Residential).

Also mark **important landmarks** such as schools, parks, places of worship, workplaces, and other prominent features that help in identifying and locating the HLB area.
- e) **Multiple HLB Assignment:** If assigned more than one HLB, prepare **separate Layout maps for each HLB**, ensuring clarity and avoiding any overlap of boundaries or features.
- f) **Cross-Verification with Supervisor:** Discuss the prepared Layout map(s) with the **Supervisor** to confirm complete coverage of the assigned HLB(s) with respect to **surrounding HLBs**. Ask the Supervisor to cross-check Layout maps prepared by other Enumerators within the **Supervisory Circle** to ensure **no omission, overlap/duplication** of areas.
- g) **Draft and Finalisation:** Treat the prepared Layout map as a **first draft**. After completion of HLO data collection through the **HLO App**, review and update the Layout map to **add any missed buildings** or **remove any inadvertently covered buildings**, as necessary.
- h) **Submission:** Finalise this **Layout map in duplicate** and submit it to the Charge Officer for record and reference.

Now you are ready to take up the next task viz., collecting Houselisting and Housing Census data in HLO mobile app. In exceptional case if information is collected in Paper Schedule, some important instructions are at Annexure III.

Annexure 4.1:

PDF copy available in your HLO App

CENSUS OF INDIA 2027

Name of State/UT: **Tamil Nadu**

Code No: **34**

Name of District: **Thiruvallur**

Houselisting & Housing Census

Specimen copy of Layout map drawn by Enumerator

CENSUS OF INDIA 2027 – Houselisting & Housing Census

Summary

A. Numbering of Buildings & Census Houses

- HLB is the basic unit; ensure complete coverage without omission or duplication.
- List every structure with a roof where people can live; open plots without roofs are not Buildings.
- Building is structure on ground; Census House is building or it's part with separate entrance/use.
- Household is identified by a common kitchen; cover Normal and Institutional Households in HLO.
- Houseless households are excluded from HLO and covered in Population Enumeration.
- Use existing building numbers given by local body; assign Census numbers only where numbering is absent or incomplete. Building number to be prefixed by CN.
- For new Building between two numbers, use sub-number (e.g., 10/1).
- Census House numbers are auto-generated in HLO App and differ from Building numbers.
- Follow a systematic numbering order (preferably North-West to South-East); show arrows where numbering jumps.

B. Steps for Preparing Layout Map

- **Prepare & Verify HLB**
 - Obtain HLB Map from HLO App/Charge Officer.
 - Check HLB details and verify boundaries on ground.
- **Field Familiarisation**
 - Walk through the entire HLB.
 - Identify roads, lanes, landmarks, clusters, and isolated structures.
- **Draw Physical Features**
 - Draw roads, streets, paths and major natural features (river, canal, railway, open areas).
- **Plot Buildings Systematically**
 - Start North-West and finish in South-East.
 - Plot every Building using prescribed symbols:
 - Pucca / Kutcha Residential / Non-residential
 - Write Building number and number of Census Houses in brackets.

- **Mark Landmarks :** Clearly mark schools, hospitals, places of worship, offices, markets, etc.
- **Numbering Direction**
 - Draw arrow marks wherever numbering sequence changes.
 - Pencil-mark first; verify with actual field situation.
- **Special Areas :** Mark forest clusters, estates/ plantations, and sub-urban growth carefully and report issues.
- **Cross-Check & Submit**
 - Verify Layout Map with Supervisor.
 - Update after HLO fieldwork.
 - Finalise and submit two copies to Charge Officer.

5. FILLING UP OF THE HOUSELISTING AND HOUSING CENSUS QUESTIONS

5.1 Before actually going to field for collection of information through HLO mobile App, you need to install the verified HLO App from Google play store/ Apple App store and thereafter follow the instructions as given in **Annexure-II** to register and login into the HLO App.

5.2 After logging with the provided credentials, you will be able to view the complete location particulars as is visible in the side screen. You have to enter expected number of buildings and census houses as marked in Layout map.

- *Ascertain that Location particulars are same as per the details given in your Appointment Letter.*
- *Fill the number of buildings.*
- *Click the Houselist Operations.*

The screenshot shows the HLO App interface. At the top, it says 'HLO App' and 'Census of India - 2027'. Below this, there's a section for 'LOCATION PARTICULARS - HLB(1/2)' with a dropdown for 'Select HLB' showing '0001'. Below that, there's a table of location details: State/UT: Test State 1-99, District: test 2 district-02, Sub-District: test 2 subdistrict-001, Town/Village: Test Statutory Town-7007, Ward Code: 0001, and House Listing Block No: 0001. Below the table is a section titled 'AS PER LAYOUT MAP' with two input fields: 'Expected No. of Buildings' and 'Expected No. of Census Houses'. At the bottom, there's an orange button labeled 'HOUSELIST OPERATIONS'.

5.3 After clicking the Houselist Operations, you will be taken to the next screen (Home page). On the Home page, the Houselisting Block assigned to you will be visible and below it the following buttons will be displayed:

HOUSELIST ENTRY: This button is used to start entry for new household.

UPDATION DATA: This button is used to edit a particular record which is not synced. Also, here you can view a list comprising of complete and incomplete census houses. (Edit and Delete Options are available).

EDIT ALREADY SYNCED DATA: This button is used to edit a particular record which is already synced, for which editing is needed.

VIEW SUMMARY: This button is used to view summary of filled-in Census Houses.

SYNC: This button allows the user to sync all completed records.

MARK AS COMPLETE: This button is used to manage the completion status of HLB.

The screenshot shows the 'HL Operations' screen. At the top, it says 'HL Operations' and 'House Listing Block No : 0001'. Below this, there's a grid of six buttons: 'NEW HOUSELIST ENTRY', 'UPDATION DATA', 'EDIT ALREADY SYNCED DATA', 'VIEW SUMMARY', 'SYNC', and 'MARK AS COMPLETE'. At the bottom, there's a footer that says 'Designed and Developed by Office of the Registrar General and Census Commissioner of India, Ministry of Home Affairs'.

SOME COMMON BUTTONS USED IN THE APP

PREVIOUS: This button is used to go to the previous screen.

JUMP: This button is used to jump to a particular screen

NEXT: This button is used to go to next screen after recording all the responses on the screen.

5.1 DETAILED INSTRUCTIONS TO FILL THE HOUSELISTING AND HOUSING CENSUS QUESTIONS

Q. 1: LINE NUMBER

- The Line number will be seen at the top in the screen.
- The Line number is disabled and auto-incremented.
- It will be displayed on the left corner of top of all the subsequent screens of the HLO App.

Q. 2: BUILDING NUMBER

5.1.1 The Building numbers should be copied from those already marked on the Building or the number written by you on the main gate or entrance of the building.

- This field accepts alpha-numeric entries to record a new building, you have to enter the building number.
- REPEAT button is shown on the right, remains disabled when entering the building number for the first Census House.
- For subsequent Census Houses or households, the REPEAT button will be enabled.
- If the building number is same as the previous one (in case of building with more than one Census House), you can press the REPEAT button for each additional Census Houses within the building.
- A dropdown menu is provided to select the appropriate building number, in case the Census House belongs to one of the previously listed buildings.

Q. 3: CENSUS HOUSE NUMBER

- This is a 4-digit numeric field and will be a running serial number in the Houselisting Block.
- For the first Census House in the first building, the Census House Number '0001' is set by default.
- Below it, the REPEAT and NEW buttons are shown.

- *Repeat button will remain disabled during the entry of 1st census house.*
- *For subsequent census houses, this button will be enabled.*
- *If the Census House Number is the same as the previous one, press the REPEAT button.*
- *If you want to assign a new Census House number, press the NEW button.*
- *The Census House Number will also be displayed at the top of every screen.*
- *After filling both the entries, i.e., Building Number and Census House Number, click on NEXT button to proceed to next screen.*

5.1.2 In accordance with the earlier instructions, you would have already numbered the buildings with marker pen along with number of census houses in bracket (please refer para 4.) Now, you also write the four-digit Census House number, auto generated in the HLO mobile App during your data collection, with the marker pen at the entrance of each individual census house.

Process of identifying SE households, verifying and saving SE data

- 5.1.3 You as an Enumerator will be visiting all households in your HLB. HLO Mobile App will auto fill the Line number. After providing *Building Number*, *Census House number* will be auto-filled for each Census House.
- 5.1.4 The next step is to determine the household's SE status. Question "Whether the Household has completed Self-Enumeration?" will follow with options 'Yes' or 'No'. If the answer is 'Yes', question no. 7 (Use of Census House) will display for choosing from two options, 1-Residence and 2-Residence cum other use. If 2 is chosen, then details of the use of house to be recorded. Household number (Q9) will be auto generated. Now you will be prompted to enter the SE ID and if it matches with the one of the SE IDs imported in your HLO App, the data of the SE Household will be displayed.
- 5.1.5 After going through the data, you have the option to "Accept and Submit" the SE data, or to "Edit" the data if you feel that the data has to be edited. If you chose "Accept and Submit" the data, the record is saved in your mobile App for syncing with server afterwards. If the Edit option is chosen the record opens in the mobile data collection format where questions are displayed screen-by-screen and you will review filled-in data and corrects the data wherever required and saves it for syncing with main server.

- 5.1.6 If SE ID does not match, then the usual process of data collection by filling up each question from question 4 onwards (except 7 and 9) takes place for the household. If 'No' is chosen, then also the usual process of data collection by filling up each question takes place for the household.
- 5.1.7 Whenever an SE record is corrected, it is tagged so that the supervisor may specially review it in the usual process.

Q. 4, 5 AND 6: PREDOMINANT MATERIAL OF THE FLOOR, WALL AND ROOF

- 5.1.8 For these three questions, the code for the predominant material used for construction of major portion of the floor, wall or roof of each of the Census House (residential as well as non-residential) is to be selected. These materials may be any one or combination of two or more of the materials listed on each screen respectively. Therefore, select the correct Code after ascertaining the predominant (major) material of the floor, wall or roof. **If any Census House is occupied by more than one Household, the entries will be made only for the first Household and App will automatically fetch the same options for each subsequent Household.** You should ask the information from the respondent in sequence and select the appropriate option based on their response.

In respect of locked/vacant Census houses skip these questions.

Q. 4: PREDOMINANT MATERIAL OF FLOOR

- *Select the option regarding Predominant material of floor from the given options.*
- *Click on the next button to proceed to the next screen.*

- 5.1.9 For the material of floor, you have to take the major portion of material out of which the floor of the house is made. For example, if in a house only the drawing room has mosaic floor while all other rooms and corridors have just cement flooring, the material of floor to be selected here will be 'Cement', i.e., Code '5'. If a house has cement floor in the bath room and all other rooms have mosaic flooring, the material of floor which will be selected in such a case would be 'Mosaic/ Floor tiles', i.e. Code '6'.

- 5.1.10 For multi-storeyed Buildings, it may be noted that the material of the floors may be same or may be different. The floor of one does not automatically become the material of floor of the other storeys. For example, in a two storeyed Building occupied by one Household, the ground floor could be of 'Cement' while the floor material of the first floor could be 'Mosaic or Floor tiles'. In such cases, the

predominant material may be taken as the material of the floor. However, if each floor is occupied by different Households, the material of the floor should be determined separately for each Census house and recorded as such. Granite and Marble are to be treated as stone and accordingly Code '4' is to be selected.

Q. 5: PREDOMINANT MATERIAL OF WALL

- *Select the option regarding Predominant material of Wall from the given options.*
- *Click on the next button to proceed to the next screen.*

5.1.11 Select the appropriate Code of the material out of which the major portion of the walls of the house is made. You will notice that the material of wall bearing Codes 1 to 5 denote materials that are not of a permanent nature. The remaining materials bearing Codes 6 to 9 are of a permanent nature. Very often, it is difficult to determine the material of the wall on account of the outside surface being plastered and painted. In such cases, you will have to ascertain from the respondent about the predominant material of the wall and select the correct Code. For example, the wall may be made of mud or unburnt brick. However, it may be plastered with cement and painted. In such cases, Code '3' is to be selected. Similarly, walls may be made of loose stones. If the stones are not packed with lime or cement mortar, Code '5' is to be selected. If walls are made of stones duly packed with lime or cement mortar then Code '6' is to be selected. In some regions, Ekra is used as a material for the construction of walls. In such cases, Code '1' (Grass/thatch/bamboo etc.) will be selected. Ply boards/laminated boards etc. are to be considered as wood. Cement bricks are to be considered as concrete whereas Ash bricks are to be considered as burnt bricks. If the respondent expresses ignorance about the wall material and also it is not identifiable, Code '0' i.e., 'Any other' may be selected.

The screenshot shows a mobile application interface for 'HLO Data'. The title bar is orange with a back arrow, 'HLO Data', and a home icon. Below the title bar, it says 'Confidential when filled', 'Line No: 001', and 'CH No: 0001'. The main section is titled 'Material Particulars' and contains a list of 10 options for the '5. Predominant material of Wall of the census house'. Each option is preceded by a radio button. The options are: 1-Grass/thatch/bamboo etc., 2-Plastic/polythene, 3-Mud/Unburnt brick, 4-Wood, 5-Stone not packed with mortar, 6-Stone packed with mortar, 7-G.I./metal/asbestos sheets, 8-Burnt brick, 9-Concrete, and 0-Any other. At the bottom of the screen, there are three orange buttons: 'Prev', 'Jump', and 'Next'.

Q. 6: PREDOMINANT MATERIAL OF ROOF

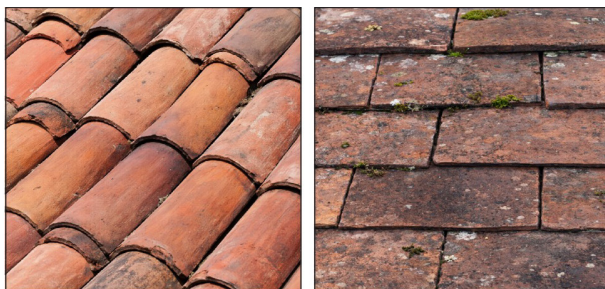

- *Select the option regarding Predominant material of Roof from the given options.*
- *Click on the next button to proceed to the next screen.*

5.1.12 Select the appropriate code of the material out of which the major portion of the roof of the house is made. For Census house having more than one floor, roof of the top floor is to be considered. However, in multi-storeyed building with separate Census houses, the roof of the each Census house is to be considered for determining the material of roof. Handmade (Desi) tiles at Code '3' are also known by various names such as Penkulu, Kavelu, desi nalia, khaprail, etc. in different parts of the country. On the other hand, Machine made tiles given at Code '4' are the tiles manufactured with the help of Machines. Cement tiles are to be categorized as Machine made tiles and Code '4' is to be selected. .

5.1.13 **Slate** at Code '7' is a fine-grained grey, green, or bluish-purple rock that can be easily divided into thin pieces, or a small, thin piece of this used to cover a roof. If the predominant material is Shingle, this will be equated with slate and code '7' will be selected.

5.1.14 In hill stations, the roof of the ground floor is made of wood, however, the roof of the top floor is made of concrete. In such cases, the roof of the Census Houses located in the Building should be taken as 'Concrete'.

Figure 19

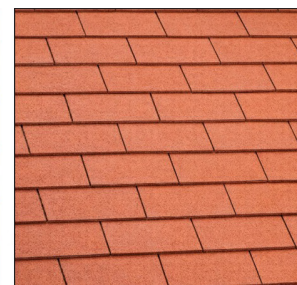

Handmade Tiles (code 3)

Slate Roofing (code 7)

Machine made Tiles (code 4)

Q. 7: ASCERTAIN USE OF CENSUS HOUSE

5.1.15 The Census houses are used for various purposes. They may be purely residential, residence-cum other uses (i.e. being used as residence along with some other purpose), or exclusively non-residential. The use of the Census House is to be ascertained with due caution and the information should be recorded in accordance with the detailed instructions provided below.

- *Select the option regarding use of Census house*
- *At the bottom of the screen, Actual Use of Census House and two checkboxes are displayed:*
 - *Is Institutional*
 - *Is Locked*
- *“Is Locked” remains enabled with all options and if selected, App will jump to end for mobile number. They will be automatically enabled based on the selection made for the use of the Census House.*
- *Based on the selected option, the app will display relevant follow-up fields/options as explained below in the box.*

The screenshot shows the 'HLO Data' app interface. At the top, it says 'Confidential when filled' and 'Line No: 001 CH No: 0001'. Below this is a section titled 'Census House Particulars' with the heading '7. Ascertain Use of Census House'. There are ten radio button options: 1-Residence, 2-Residence-cum-other use, 3-Shop/office, 4-School/college etc., 5-Hotel/lodge/guest house etc., 6-Hospital/dispensary etc., 7-Factory/workshop/workshed etc., 8-Place of worship, 9-Other non-residential use, and 0-Vacant. Below the options is a text field labeled 'Enter actual use'. At the bottom, there are two checkboxes: 'Is Locked' and 'Is Institutional'. At the very bottom are three orange buttons: 'Prev', 'Jump', and 'Next'.

5.1.16 **Residence (Code '1'):** If the Census House is used solely for residential purpose and not in combination with any other purpose(s), then Code '1' should be selected.

Illustrations: Census Houses such as hut, apartment, kothi, out-house, tent, gangmen's hut, bungalow, military barrack, forest guards' hut, Jhuggi-Jhopri, etc., used exclusively for residential purposes.

- *Option 1 (Residence): In case option 1 is recorded, the Enumerator has to fill all the 34 questions. 'Enter actual use' will be a disabled field here.*
- *If the census house is found locked, tick mark 'Is locked' option. All further entries will be skipped and you will be navigated to Q32 i.e., mobile number.*
- *Option 2 (Residence cum other use): In case option 2 is recorded, enter actual use and proceed to next screen. The Enumerator has to fill all the 34 questions.*
- *In case the HH is institutional, tick mark 'Is institutional' and then proceed. You will be directed to record only a few questions up to 11. In this case, App will allot household number "999" for institutional household in Q9.*
- *Option 3-9 (Non-residential): In case any option from 3-9 is recorded, enter actual use and click next. No further entries are to be recorded in this case.*

- **Option 0 (Vacant):** In case this option is selected, enter actual use and click next. No further entries are to be recorded in this case.
- **Is institutional:** This checkbox will be enabled only if option 2 was recorded.
- **Is locked:** In case the census house is found locked, tick mark this option, record the actual use as applicable and the app will jump to the last question i.e., mobile number.

5.1.17 **Residence-cum-other use (Code '2'):**

If the Census House is used for residential purpose along with one or more non-residential purpose(s) such as clinic, shop, gym etc. then code 2 should be selected in the App. In such cases, the non-residential use must be specified by entering a description prefixed with 'Residence-cum-' (e.g., Residence-cum-vegetable shop, Residence-cum-clinic etc.) If the appropriate option is not available in the list, it should be typed manually. **This situation will apply to those houses which have only one access but are used for residence in combination with non-residential use(s).**

Illustrations:

Residence-cum-grocery shop, Residence-cum-cloth shop, Residence-cum-fruit shop, Residence-cum-vegetable shop, Residence-cum-pan bidi shop, Residence-cum-cigarette shop, Residence-cum-general store, Residence-cum-milk stall, Residence-cum-stationery shop, Residence-cum-sweet shop, etc.

5.1.18 **Residence-cum-Factory** (registered manufacturing or repairing or warehousing establishment using power and employing 10 or more persons or without power but employing 20 or more persons) or **Residence-cum-Workshop** (where any kind of production, processing, repair or servicing goes on or where goods and articles are made and sold on small scale. This includes Household Industry such as bidi making at home, toy making at home, pottery making at home, tailoring at home, gold and silver smithy workshop at home, cycle repairing at home, book binding at home, black smithy at home, cloth weaving at home, making wooden articles at home, kangri (fire pot) manufacturing at home, making of paper mache at home, cloth printing/dying at home, atta chakki at home, manufacturing of bakery products at home, etc.).

5.1.19 Some of the occupations such as gold smithy, black smithy, tailoring, watch repairing, repairing of electrical goods, etc., are sometimes carried out within a Census House which are used for both purposes, i.e. residence as well as workshop. For example, if a Census House is used for Residence as well as for silver smithy or for watch repairing or for toy making, etc., type 'Residence-cum-workshop' in the App. Residence-cum-temple, Residence-cum-school, Residence-cum-creche, Residence-cum-Doctor's clinic, Residence-cum-office, Residence-cum-restaurant, Residence-cum-eating place, etc.

- 5.1.20 In big wholesale market places such as Chandni Chowk in Delhi, Bara Bazar in Kolkata and Kalba Devi in Mumbai, a large number of persons working in these shops or offices (Gaddis) also use it as residence during night time. Such places should be correctly identified and selected as Residence-cum-shop or Residence-cum-office, etc.
- 5.1.21 **Institutional Households:** Residence-cum-old age home, Residence-cum-hostel, Residence-cum-boarding house, Residence-cum-rescue home, Residence-cum-jail, Residence-cum-lodge, Residence-cum-ashram, Residence-cum-guest house, Residence-cum-leprosy home, etc.
- 5.1.22 While entering the purpose of the use of Census Houses in which Institutional Households live, the nature or the name of institution will be suffixed to residence such as Residence-cum-Old Age Home, Residence-cum-Boarding House, Residence-cum-Hostel, Residence-cum-Rescue Home, Residence-cum-Jail, Residence-cum-Lodge, etc. In many cases, you will find that Dak bungalow or Dharamshala or Hotel or Ashram or Nursing Home, etc., are used only for temporary stay or stay in transit and none of the residents living in such institutions fulfil the criteria of Institutional Households. All houses where such institutions are found will be treated as used for totally non-residential purposes. In these cases, only the nature or the name of institution will be typed after choosing an appropriate Code. However, if a group of persons normally residing in any such institution, they will be treated as such and the use of the Census House will be entered as Residence-cum-Dak bungalow or Residence-cum-Dharamshala, etc. **Remember that “Institutional Household” is different from “Institution” like School, College, Hospital etc.**
- 5.1.23 If in a hotel or lodge, the manager or servants or other persons are also living in separate rooms as normal residents, then such room(s) occupied by them will be treated as separate Census Houses and select Code ‘1’, i.e. Residence. The remaining rooms rented out to visitors for temporary stay or stay in transit should be treated as a single Census House and Code of Hotel/lodge/guest house etc., i.e., Code ‘5’ is to be selected.
- 5.1.24 There may be cases where Census Houses are used only for seasonal activities and at the time the Houselisting carried out by you, this seasonal activity may not be taking place. Such seasonal activities would be oil mills (Ghani), Gur making in sheds, etc. It is necessary that the seasonal use of such Census Houses for running of an establishment is recognised and that this seasonal use is entered as per the appropriate Code and Name. You should, therefore, make probing enquiries regarding such activities so that the complete picture regarding the use of the Census House is available, i.e. every structure of the assigned block needs to be recorded.

Shop/Office (Code ‘3’):

- 5.1.25 For Census House exclusively used as a Shop (where articles are bought

and/or sold in cash or credit) or an Office, select Code '3' type the nature of shop or of the office through App.

- 5.1.26 The actual use of a Census House must be described as fully as possible. If a Census House is used as a shop, specify whether it is a Kirana Shop or Cloth Shop or Chemist Shop, etc. Similarly, if it is used as an office, bank, school, clinic, club, or other establishment, the name of the office or the bank etc. needs to be typed after selecting the respective Code.

Illustrations:

Shop: Cloth shop, general provision store, chemist shop, restaurant (without lodging facility), tea stall, vegetable shop, fruit shop, kabaadi shop, plywood shop, eating place, coffee house, bhojanalay, canteen, jalpangrah, bar, tandoor-dhaba, chat shop, Udipi, etc.

Office: Census House which is used exclusively as Government office, office of a firm or company, commercial or business house, office of the local body, bank, insurance company, co-operative society, advocates/lawyers, stock broker, transport company, etc. Government offices include Police Station, Court, Fire Station, Tahsildar's Office, Office of Ministry, etc.

School/College etc. (Code '4'):

- 5.1.27 For a Census House used as educational institution or training centre (without lodging facilities or any residential use) select Code '4' and type the nature of educational institute through App.

Illustrations:

Pathshala, music school, carpentry training centre, coaching centre, school, college, dancing school, agricultural training centre, adult literacy centre, shorthand and typing institute, computer training centre, vocational training centre, Industrial Training Institute, etc.

Hotel/lodge/guest house etc. (Code '5'):

- 5.1.28 For a Census House which is used exclusively for temporary stay or stay in transit and where no person is found normally residing, select Code '5' and type the nature or name of such hotel/lodge/guest house, etc. through App.

Illustrations:

Dak bungalow, Inspection bungalow, Circuit house, State guest house, Ashram, Sarai, Dharamshala, Musafirkhana, Vishramgrah, Night Shelter, Hotel, Lodge, Community rest house, Chaultry, Travellers bungalow, etc.

If any of such hotel or lodge or guest house is used by the inhabitants as a normal residence then select Code '2' and type 'Residence-cum-hotel/'

‘Residence-cum-lodge’/ ‘Residence-cum-guest house’ as the case may be.

Hospital/Dispensary etc. (Code ‘6’):

- 5.1.29 In case the Census House is exclusively used as a hospital or a dispensary or any other health or medical centre, select Code ‘6’ and type its name through App. **Please remember, here only those institutes will be covered which do not qualify to be treated as Institutional Households**

Illustrations:

Hospital, pathological centre, doctors’ clinic, nursing home, maternity home, **dental clinic, dispensary, vaccination centre, X-ray clinic, first-aid centre, etc.**

Factory/workshop/workshed, etc. (Code ‘7’):

- 5.1.30 If the Census House is exclusively used for running a factory or a workshop or used as a workshed, select Code ‘7’- factory/workshop/workshed through App. These are places where manufacturing, production, processing, repairing or servicing takes place or where goods and articles are made and sold. They may be large scale industries/small workshops/worksheds.

Illustrations:

Spinning mills, cotton mills, fertilizer factory, hosiery manufacturing workshop, watch repairing centre, automobile servicing station, bakery, shoe making, furniture making, rice/flour/oil mills, printing press, dairy, aerated water factory, black smithy workshop, gold/silver smith’s workshop (saraf shop), loco shed, etc.

Place of worship (Code ‘8’):

- 5.1.31 If the Census House is exclusively used as a temple or gurudwara or mosque or church or any other place of worship select Code ‘8’ and mention accordingly by typing through App.

Illustrations:

Temple, gurudwara, mosque, church, prayer hall, satsangh hall, etc.

Other non-residential use (Code ‘9’):

- 5.1.32 This category will cover the Census Houses used as places of entertainment and community gathering and all other non-residential miscellaneous uses of the Census Houses which have not been covered in any of the above categories (Codes 1 to 8). In this case, select Code ‘9’ and type the actual use of the Census House through App.

Illustrations:

Community centre, cinema house, club, theatre, kalamandir, vyayamshala, stadium, museum, kalamanch, zoo, gymnasium, cattle shed, goshala, stable, bull breeding centre, poultry breeding centre, garage (for keeping automobile), passengers' shelter, waiting hall, power sub-station, pump house, godown, petrol pump, library, tube-well room, etc.

Vacant (Code '0'):

- 5.1.33 If a Census House is found vacant at the time of Houselisting, i.e. no person is living in it and it is not being used for any other non-residential purpose(s), select Code '0' and do not forget to mention reason of vacancy. Please type 'Vacant' together with reason of vacancy i.e. 'Vacant-under repair', 'Vacant-construction incomplete', 'Vacant-to let', 'Vacant-want of tenant', etc., as the case may be. If the Census House was found locked because the occupants have gone on a journey or pilgrimage, then it should not be treated as 'Vacant'. In this case, the actual use of house should be entered and the fact that the occupants have gone on journey or pilgrimage may be typed as 'House locked - occupants on journey/pilgrimage'. However, if mobile number of any member of the Households is available from the neighbour(s), it needs to be entered at the end. If mobile number is not available, it does not need to be entered

Illustrations:

Vacant -dilapidated, Vacant -want of repair, Vacant - under construction, Vacant -want of tenant, Vacant -awaiting demolition, Vacant-any other reason (specify).

Q. 8: CONDITION OF THIS CENSUS HOUSE

- *If code '1' or '2' in Q.7, select the option regarding Condition of this Census House from the given options.*
- *Institutional Households do not come under the purview of this question.*
- *Click on the next button to proceed to the next screen.*

Good (Code '1'): Houses which do not require any repairs and are in good condition may be considered as 'Good' and Code '1' may be selected.

Livable (Code '2'): Houses which require minor repairs may be considered as 'Livable' and Code '2' needs to be selected.

Dilapidated (Code '3'): Houses which show signs of

The screenshot shows a mobile application interface for 'HLO Data'. At the top, there's a status bar with the time 17:17 and battery level 47%. Below the title bar, it says 'Confidential when filled'. The main content area is titled 'Census House Particulars' and shows '8. Condition of this census house' with three radio button options: '1-Good', '2-Livable', and '3-Dilapidated'. At the bottom, there are three orange buttons labeled 'Prev', 'Jump', and 'Next'. The bottom navigation bar has three icons: a list icon, a square icon, and a back arrow icon.

decay or broken down and require major repairs or those houses decayed or ruined and cannot be restored or repaired may be considered as 'Dilapidated', Code '3' may be selected in this case.

5.1.34 The above classification of a Census House into Good, Livable or Dilapidated is only to assist the respondent in answering. However, it is advised that whatever is finally returned by the respondent may be selected.

Questions 9-13 will be visible only for those Census Houses which are used wholly or partly as a Residence i.e. if Code '1' or '2' is selected in Q.7.

Q. 9: HOUSEHOLD NUMBER

5.1.35 **The numbering of the Buildings, the Census Houses and the Households are closely linked.**

- *This field is disabled and Auto-incremented*
- *Household number will automatically appear depending upon the selection made in the use of Census House and it's other details such as "Locked" or "Institutional" or both for all "Residence" and "Residence-cum-other use."*
- *For all census houses having "Residence" or "Residence-cum-other use", a household number will be automatically assigned in the App.*
- *If option is "Residence-cum-other use" and "Is Institutional", then App will allot household number "999" for institutional household.*
- *If option is "Residence-cum-other use" with "Is Locked" then App will not allot any household number.*
- *If option is "Residence-cum-other use" with "Is Institutional" and "Is Locked (Both)" then App will not allot any household number*

The screenshot shows the 'HLO Data' app interface. At the top, it says 'Confidential when filled'. Below that, it displays 'Line No: 001' and 'CH No: 0001'. A section titled 'Head of Household Particulars' contains a form for '9. Household number' with the value '001' entered. Below this is '10. Total number of persons normally residing in this household' with an 'Enter Count' field. At the bottom is '11. Name of the head of the household' with an 'Enter name' field. Navigation buttons 'Prev', 'Jump', and 'Next' are at the bottom, along with a home indicator bar.

5.1.36 It is possible that there may be more than one Household in a Census House. Each such Household will be given a separate number.

Q.10: TOTAL NUMBER OF PERSONS NORMALLY RESIDING IN THIS HOUSEHOLD

5.1.37 The total number of persons normally residing (including disabled) in each of the Normal as well as the Institutional Households is required to

be recorded. This will include persons of all ages including infants and elderly. In this, normal residents are to be counted even if, some of them may be absent on the day of your visit. Casual visitors should be excluded as they will be considered at their respective places of normal residence.

- *Remarks: This field is mandatory.*
 - *Enter the total number of persons in the household.*
 - *Now proceed to the next field.*
-
- *Remarks: This field is mandatory.*
 - *Enter the Name of the head of the household.*
 - *Click on the next button to proceed to the next screen.*

Q. 11: NAME OF THE HEAD OF THE HOUSEHOLD

5.1.38 The head of the Household is a person who is recognized as such in the Household and generally bears the chief responsibility for the maintenance of the Household and takes decisions on behalf of the Household. The head of the Household need not necessarily be the eldest male member, but can be of any gender or a younger member, normally residing in the Household.

5.1.39 In the case of Institutional Households, such as hostels, old age homes, orphanages, rescue homes, jails, etc., where the head of the Institutional Household can be recognized by designation such as, Hostel Warden, Manager, Jailor, etc., the designation is to be entered in place of entering the name.

For Institutional Households, 12 (Sex) and 13 (SC* or ST* or other) will not be displayed.

Q. 12: SEX

5.1.40 In this question, select the sex of head of the Household as Male (Code '1') or Female (Code '2') or Transgender Person (Code '3'), as returned by the respondent.

- For Sex of the head of the household select the option
- Now proceed to Q.13.

- For category pertaining to head of the household, select the option from the given options.
- Click on the next button to proceed to the next screen.

16. Number of married couple(s) living in this household

Enter number of married couples

Prev Jump Next

5.1.42 If a Household is occupying the Census House owned by itself and is not making payments in the form of rent to anyone, then the Household may be considered as living in **owned house**. A Household living in a Flat or a House taken on 'ownership' basis on payment of instalments, should also be regarded as owning the house, notwithstanding the fact that all the instalments have not been paid. In all such cases, select Code '1'.

5.1.43 A housing unit is **rented**, if rent is paid or contracted for by the Household in cash or even in kind. In a few cases, it may also be possible that the Household has actually taken the house on rent but not paying the rent on account of dispute with the owner or for some other reason. In this situation too, the Household would be treated as living in a rented house.

If the Household lives in a rented house but they have their own house elsewhere in India (i.e. either parental or own purchased) select Code '2'.

If the Household is living in a rented house and also doesn't have any own house(s) anywhere in India, select Code '3'.

Rented accommodation provided by employer like Government quarters and similar accommodation, will be selected either Code '2' or Code '3', as per the case.

5.1.44 If the Household lives in a house which is neither owned nor rented, Code '4' may be selected. This will include the cases where accommodation is provided to employees by their employer without any charges or where the ownership either of the land or of the structure does not belong to the Household, i.e., houses constructed on encroached land or anywhere else. Also, **the Households living in unauthorized manner in abandoned Buildings, Buildings under construction and Buildings identified for demolition for which they have not to pay any rent and the Households living in caves and similar natural shelters are also covered under this category. In all such cases, Code '4' will be selected.**

Q. 15: NUMBER OF DWELLING ROOMS EXCLUSIVELY IN POSSESSION OF THIS HOUSEHOLD

- *Enter the number of dwelling rooms in the Census House in Q. 15.*
- *Now proceed to Q. 16.*

5.1.45 Enter the number of dwelling rooms (0, 1, 2, 3, ...) exclusively in the possession of the Household. A room used for dwelling should have walls with a doorway and a roof and should be wide

The screenshot shows a mobile application interface for 'HLO Data'. At the top, it says 'Confidential when filled' and shows 'Line No: 001' and 'CH No: 0001'. Below this is a section titled 'Census House Particulars'. Question 14, 'Ownership status of this house', has four radio button options: '1-Owned', '2-Rented but has own house elsewhere', '3-Rented and doesn't own any house', and '4-Any other'. Question 15, 'Number of dwelling rooms', includes a note: 'Do not include kitchen, bathroom, latrine, store room, passageway and verandah. Include living room, bedroom, dining room, drawing room, study room, servant's room and other similar rooms.' Below the note is a text input field labeled 'Enter Count'. Question 16, 'Number of married couple(s) living in this household', has a text input field labeled 'Enter number of married couples'. At the bottom are three buttons: 'Prev', 'Jump', and 'Next', along with a page indicator 'III'.

and long enough for a person to sleep in, i.e., the minimum length of the dwelling room should not be less than 2 meters, a breadth of at least 1.5 meters and a height of 2 meters.

- 5.1.46 The dwelling room includes living room, bedroom, dining room, drawing room, study room, servant's room and other similar room. **Do not count kitchen, bathroom, latrine, store room, passageway and verandah, as dwelling room.**
- 5.1.47 **A room used for a multi-purpose, such as sleeping, cooking, bathing, dining, storing, sitting etc. should also be consider as a dwelling room.** Where a Census House is used as residence-cum-other use, the room(s) used for purposes other than Residence will not be considered as a dwelling room. When there is only one room in Census House used as a shop or office and the Household also resides in it, then enter zero '0' since there is no exclusive dwelling room for the Household.
- 5.1.48 A conical shaped room (hut/tent) where a Household resides may also be considered to be a dwelling room.
- 5.1.49 If a garage or a servant quarter is used by a servant and she/he lives in it as a separate Household; it should be reckoned as a dwelling room available to the servant's Household. If the servant is considered as a member of the Household, then the garage room should be reckoned as an additional dwelling room of the Household.
- 5.1.50 **A dwelling room which is shared by more than one Household will not be counted for any of the Households because only dwelling room which is exclusively in the possession of the Household are to be counted. For example, if two Households share a single dwelling room and therefore neither has a dwelling room exclusively, enter zero ('0') for each of the Households. If two Households have a dwelling room each but in addition also share a common dwelling room, then the common room will not be counted for either of the Households.**

Q. 16: NUMBER OF MARRIED COUPLE(S) LIVING IN THIS HOUSEHOLD

- *Enter the number of married couples living together in the Census House in 16.*
- *Press the NEXT button to go to the next screen.*
- *Remarks: Number of married couples cannot not be greater than Total person in (Q.10) minus 1.*

Enter number of married couples

Prev Jump Next

- 5.1.51 In this Question, enter the number (0, 1, 2, 3, ...) of currently married couples living together in the Household, irrespective of their age. A 'couple' is generally formed through marriage. However, if respondent says Live-in-Relationship as "stable-de-facto union", it is also considered as married couple. Count those couples who are normal residents even if one of the spouses is temporarily absent. If the person is living all alone or if no married couple is present in the Household, enter zero ('0').

Questions 17-25: AMENITIES AVAILABLE TO THE HOUSEHOLD

It is important to ascertain whether the amenities in Q.17 to Q.25 are available to the Household.

Q. 17: MAIN SOURCE OF DRINKING WATER

- *Select the option regarding main source of drinking water available to the household from the given options.*
- *Click on the next button to proceed to the next screen.*

- 5.1.52 If a Household gets drinking water from two or more sources, the source availed of more or during major period of the year should be selected.

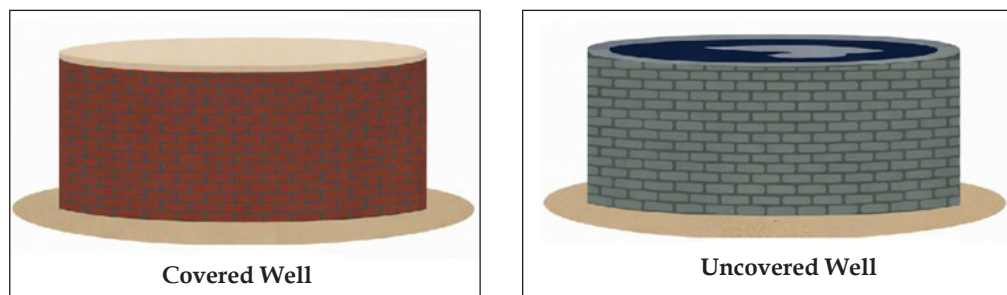

Code '1'-Tap Water from treated source: The mere fact that drinking water is flowing from a tap does not automatically mean that the water is safe for drinking. Only after proper treatment which involves the removal of impurities by filtration and disinfection by chemical treatment, can the water be considered safe. Thus, the water being supplied by tap may be directly from a well (covered or uncovered), tube well, borehole, tank, pond etc. It is important to ascertain whether the tap water is being supplied from a treated source or not. Tap Water from treated source refers to a source of drinking water which is provided to individual Households through pipes within the premises or to a group of Households through common taps (public taps/ community water points) by the Govt. departments, Local Bodies, Panchayats, public or private estate agencies, etc. after treatment. Only such water should be considered as tap water from treated source. If a Household is drawing untreated water through pipes either directly from a well or borehole or after pumping the well or tube well water to an overhead water tank, such a source should not be construed as Tap water from treated source. If drinking water is supplied through pipes to individual flats/apartments from a common R.O. System or any other type of treatment plant installed in the Building/ local area, it should also be considered as Tap water from treated source. However, in case individual houses are getting untreated water and are using some local means of improving the quality of water by simple filtration, boiling or even using small equipment like water purifiers etc., this should not be treated as Tap water from treated source.

14:35 40%

☐ 4-Hand Pump
☐ 5-Tubewell/borehole
☐ 6-Spring
☐ 7-River/canal
☐ 8-Tank/pond/lake
☐ 9-Packaged/bottled water
☐ 0-Other source
Prev Jump Next
||| □ <

Code '2'- Tap water from un-treated source: If a Household is drawing drinking water through pipes either directly from a well or borehole or after pumping the well or tube well water to an overhead water tank, or the water is supplied through pipes to individual Household within the premises or to a group of Households through common taps by Residents Welfare Association or any other agency without treatment, such a source should be treated as Tap water from Un-treated source.

Code '3'- Well: A well includes both covered/un-covered wells.

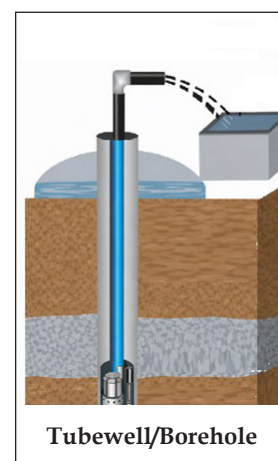

Figure 20

Code '4'- Hand Pump: Hand Pump means where the ground water is taken out manually by operating a Hand Pump. Hand Pumps are constructed with casing, or pipes, which prevent the small diameter hole from caving in and protect the water source from infiltration by run-off water. Hand Pumps are usually protected by a platform around the hole, which leads spilled water away from the deep hole made in the ground.

Code '5'- Tube well/Borehole: Tube well denotes the ground water source from where ground water is taken out through electrical or diesel pump. Tube wells/Boreholes are constructed with casing, or pipes, which prevent the small diameter hole from caving in and protect the water source from infiltration by run-off water. Tube wells/Boreholes are usually protected by a platform around the well, which leads spilled water away from the deep hole made in the ground.

The sources of drinking water such as spring (**Code '6'**), River/ Canal (**Code '7'**), Tank/pond/lake (**Code '8'**) are self-explanatory.

Code '9'- Packaged/ Bottled Water: Drinking water packaged in bottles, jars, pouches and similar containers will be classified as Packaged/Bottled drinking water. Generally, this packaged drinking water meets certain safety standards and are considered safe for drinking. Tap water, well water etc., kept by Households in bottles/ jars for convenience, will not be treated as Packaged/ Bottled drinking water.

Code '0'- Other source: For the drinking water source like tankers/carts, rain-water etc. which are not covered in any of the categories under Codes '1' to '9', select Code '0'.

Q. 18: AVAILABILITY OF DRINKING WATER SOURCE

- *Select the option regarding availability of drinking water source from the given options.*
- *Click on the next button to proceed to the next screen.*

5.1.53 If the main source of drinking water is available within the premises, select Code '1'. If the drinking water source is near the premises, select Code '2' and select Code '3' if the source is away.

5.1.54 **The drinking water source available 'Near the premises', i.e., Code '2' will be considered only if the available source is within a range of 100 metres from the premises in Urban areas and within a distance of 500 metres in the case of Rural areas.**

5.1.55 Therefore, if the available drinking water source for the Household living in Urban area is 100 metres or more from the premises, Code '3' will be selected. For the Households living in Rural areas, the drinking water source will be considered 'Away' i.e. Code '3', if it is located at a distance of 500 metres or more from the premises.

5.1.56 If source of drinking water is Packaged/Bottled water and supplied at the doorstep then it will be considered as Within premises and will be selected Code '1'. In other cases, Code '2' and Code '3' will be selected depending on the distance of the point of supply.

Q. 19: MAIN SOURCE OF LIGHTING

- *Select the appropriate option of Main source of lighting in the household from the given options.*
- *Record the actual source of the lighting used by the Household for greater part of the last twelve months.*
- *Click on the next button to proceed to the next screen.*

5.1.57 **Select Code '1' (Electricity), whether the electric connection for lighting is legal or not. Other oil (Code '4') as a source of lighting includes both edible and non-edible oils used for lighting. Any**

other (Code '5') source of lighting may include candle/wood/biogas/ petromax lights etc. If, in exceptional circumstances, the Household does not use any source of lighting, select Code '6'.

Q. 20: ACCESS TO LATRINE

5.1.58 If the Household has access to latrine within or outside the Census house which is available for use exclusively for the members only, select Code '1' and if it is being shared with other Household, select Code '2'. If the Household does not have latrine but the members of the Household are using public latrine, select Code '3'.

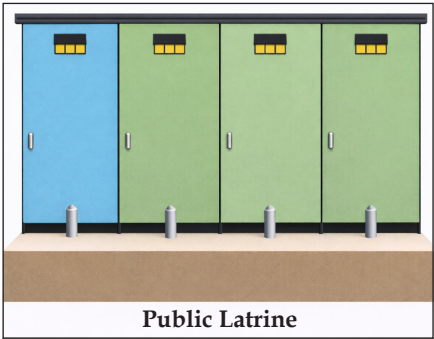

- Select the option regarding Type of Latrine from the given options.
 - Click on the next button to proceed to the next screen.

The screenshot shows the 'HLO Data' mobile application interface. At the top, it says 'Confidential when filled' and displays 'Line No: 001' and 'CH No: 0001'. Below this is a section titled 'Amenities available to the household'. The question '20. Access to latrine' is displayed. Under 'Yes', there are three radio button options: '1-Exclusively for household use only', '2-Shared with other household' (which is selected), and '3-Public latrine'. Under 'No', there is one radio button option: '4-Open'. At the bottom, there are three buttons: 'Prev', 'Jump', and 'Next'. The status bar at the very top shows the time as 17:18 and battery level at 47%.

5.1.59 The latrine facility can be exclusive or it may be combined with the place for bathing. In this situation, both the facility of latrine and bathroom will be treated as available. It may be noted that several Households may be sharing a common latrine. All such shared latrines cannot be treated as public latrines. The essential point of difference between a shared latrine and a public latrine is that while a shared latrine is available only for the exclusive use of the Households concerned, a public latrine is accessible to any member of the public, either on payment or free.

Figure 21

5.1.60 For example, a group of Households of an apartment complex are sharing a common set of latrines which are available on each floor. In such case, the latrine will be treated as available to the Household and Code '2', i.e. Shared with other Household should be selected.

Examples of public latrines are Sulabh Souchalaya, common latrine available outside the premises, mobile toilet etc. If the Households are using open area such as open fields, bush, railway tracks etc., then select Code '4'.

5.1.61 **Important:** In few cases, the Households construct Latrines to a nearby plot outside premises due to space constraints or other reasons. In such cases, if the Latrine is used exclusively by the Household or jointly by a limited set of Households and they control its access, it will be considered as if they have Latrine and Code '1' or '2' will be selected as the case may be.

Q. 21: TYPE OF LATRINE

5.1.62 If the latrine is available exclusively for the Household or it is being shared with other Households, then the Code for type of latrine is to be selected from the list of options provided.

The different types of latrine are detailed below:

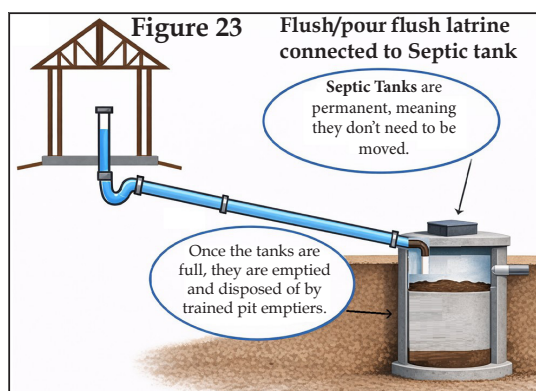

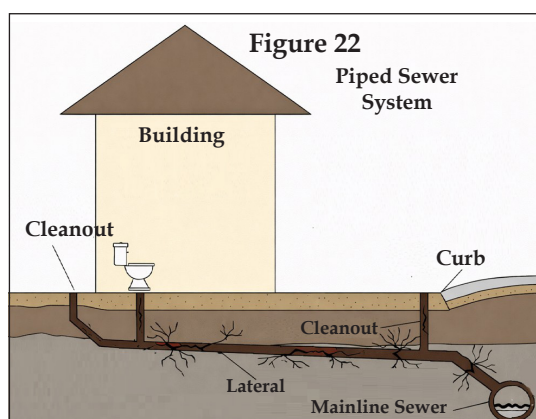

5.1.63 Flush/pour flush latrine: A flush/pour flush latrine has a water seal, which is a U-shaped pipe, below the seat or squatting pan that prevents the passage of flies & odour. The waste is removed by flushing water from a tank or by pouring.

- *Select the option regarding Type of Latrine from the given options.*
- *Click on the next button to proceed to the next screen.*

Piped Sewer System: Select Code '1' if the flush/pour flush latrine is connected to piped sewer system. This is a system of sewer pipes

(also called sewerage), that is designed to collect human excreta

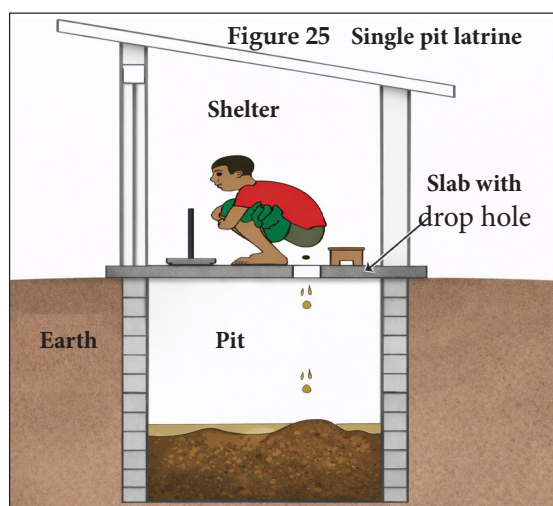

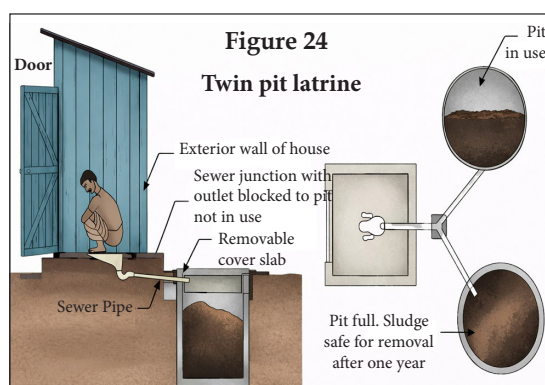

and wastewater and remove them from the Household environment. Sewerage system consists of facilities for collection, pumping, treating and disposing of human excreta and wastewater. It is usually underground and maintained by the public authorities.

Septic Tank: Select Code '2' if the flush/pour flush latrine is connected to Septic tank. Septic tank is an excreta collection device consisting of a water-tight settling tank normally located underground, away from the house or latrine. Septic tanks are cleaned periodically (usually after a few years) either manually or by machines. This should not be confused with Code 8 and 9 (night soil removed by humans/serviced by animals).

Other System: Select Code '3', if the flush/ pour flush latrine is connected to any other system other than Piped sewer system or Septic tank, e.g. excreta may be flushed to the street, yard/ plot, drainage ditch or other location.

5.1.64 PIT LATRINES A pit latrine is a type of toilet that collects human faeces in a hole in the ground. Pit Latrines are of two types:

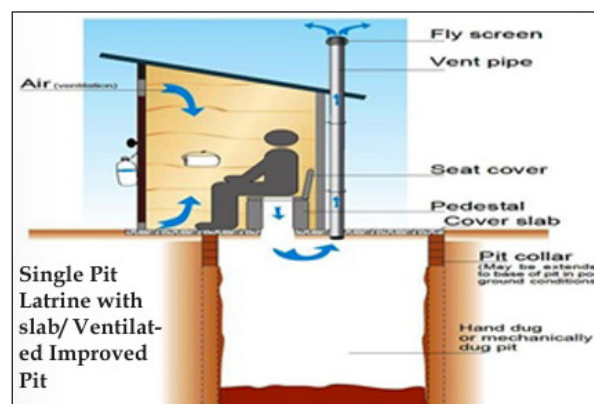

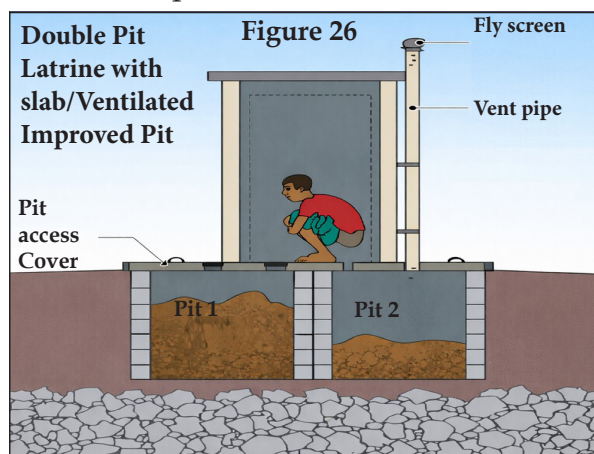

Pit Latrine with slab/Ventilated Improved Pit (Code '4' or '6'): A pit latrine with a squatting slab or platform or seat firmly supported on all sides which is raised above the surrounding ground level to prevent surface water from entering the pit and is easy to clean is called a 'Pit latrine with Slab'. Such pit latrines are sometimes ventilated by a pipe extending above the latrine roof and the open end of the vent pipe is covered with mesh or fly-proof net. This is referred to as Ventilated Improved Pit latrine. If Pit latrine is with slab/Ventilated Improved, then select Code '4' or '6' as per the number of pits.

Without slab/open pit (Code '5' or '7'): A pit latrine without a squatting slab or platform or seat is called a pit latrine without slab.

Twin pit latrine: The Twin Pit Water Seal Toilet is an on-site sanitation measure with two pits which are used alternately. Both pits are connected with a junction chamber and Pit walls have a honeycomb structure. The bottom of the pit is not plastered and is earthen. First pit, after it gets filled up in about five years, is blocked at the junction chamber and second pit is put in operation. The watery part of excreta percolates in soil through the honey comb structure. After one year of blockage of the first pit, its contents degrade completely and turn to solid, odourless, pathogen free manure.

Single pit latrine: The Single Leach Pit is one of the most widely used sanitation technologies. Excreta, along with anal cleansing materials (water or solids) are deposited into a pit. Lining the pit prevents it from collapsing and provides support to the superstructure.

An open pit is a rudimentary hole in the ground where night soil is collected. If Pit latrine is without slab, then select Code '5' or '7' as per the number of pits.

- 5.1.65 **Service latrine (Code '8' or '9'):** In some parts of the country, if the waste material is either collected in a bucket or other container or even in the open, and is removed physically by human beings, select Code '8'. If the Household has the type of latrine from where night soil is removed by animals, select Code '9'.
- 5.1.66 **Night soil disposed into open drain (Code '0'):** In some parts of the country, there is facility of a latrine within the premises but the waste material is disposed directly into the open drain. In such cases, Code '0' should be selected.

Q. 22: WASTE WATER OUTLET CONNECTED TO

- *Select the option regarding connection of waste water outlet, from the given option.*
- *Click on the next button to proceed to the next screen.*

5.1.67 The system of disposal of waste water and other liquid wastes from the house is known as drainage system. The waste water may consist of waste water from kitchen, bath and wash water. However, it does not include the wastes from the latrines. If the Census House has water outlet connected to some form of drainage system to carry away the waste water generated by the Household(s) living in it, find out if it is connected to closed drainage or open drainage.

5.1.68 If this waste water outlet is connected to closed drainage, select Code '1' and if it is connected to open drainage, select Code '2'. If the waste water outlet is not connected to any drainage system and the water flows in an unregulated manner, select Code '3'. It is also possible that there is a common disposal of both waste and latrine water. In such cases also, select appropriate Code.

Q. 23: BATHING FACILITY AVAILABLE WITHIN THE PREMISES

- *Select the option regarding availability of Bathing facility within the premises.*
- *Click on the next button to proceed to the next screen.*

- 5.1.69 If an exclusive room within the premises is used for bathing, select Code '1' and if, an enclosure without roof is used for bathing, select Code '2'. If the bathroom or enclosure for bathing is not available within the premises, select Code '3'. **The main concern is availability of Bathing facility not the number of bathrooms.**
- 5.1.70 If two or more Households live in a Census House and shares a common bathroom/enclosure without roof for taking bath available within the premises, it will be considered that the facility is available to all the Households and Code '1' or '2' as the case may be will be selected for the respective Households. Similarly, if in any house bathing and latrine facilities are available collectively in a single room/enclosure without roof within the premises, the Household will be considered to have both the facilities available.

Q. 24: AVAILABILITY OF KITCHEN AND LPG / PNG CONNECTION

- *Select the option regarding availability of kitchen and availability of LPG/PNG from the given options.*
- *Click on the next button to proceed to the next screen.*

- 5.1.71 Kitchen is a separate room being used for the purpose of cooking of meals. Code '1' will be selected if a Household cooks meal in the kitchen and also has LPG/PNG connection. If a Household cooks meal in the kitchen but does not have LPG/PNG connection, Code '2' is to be selected.
- 5.1.72 If the Household cooks meals within the Census House in an enclosed space but there is no separate room as kitchen, Code '3' or '4' needs to be selected based on whether the Household has LPG/PNG connection or not.
- 5.1.73 If meals are cooked by the Household in an unenclosed space or outside the house, then select Code '5' or '6' based on the availability of the LPG/ PNG connection.
- 5.1.74 In case due to exigencies of work or any other reason if the Household does not cook, select Code '7' irrespective of the fact whether the Household has a kitchen or not.
- 5.1.75 If the kitchen/un-enclosed space is being shared by two or more Households of a common house for cooking purpose, Codes '1' to '6'

needs to be selected for all the Households, as per the case, but the LPG/ PNG connection will to be selected only for the Household having LPG/ PNG connection.

Information on two aspects is to be collected in this question – availability of a kitchen and availability of an LPG/PNG connection. The availability of a kitchen must be confirmed first by ascertaining whether cooking is done inside the house with a separate kitchen, inside the house without a separate kitchen, or in the open/outside the house. Only after confirming this should the details of availability of an LPG/PNG connection be recorded.

Q. 25: MAIN FUEL USED FOR COOKING

- *Select the option regarding the Main Fuel being used for cooking from the given options.*
- *Click on the next button to proceed to the next screen.*

5.1.76 If the Household is using more than one fuel for cooking, the primary/predominant fuel used for cooking is to be selected.

5.1.77 Firewood (Code '1') includes woods of different types such as timber, branches and trunk of trees and shrubs, etc. Similarly, Crop residue (Code '2') includes leftovers of crops such as cotton or pulse stems, paddy or wheat or maize straws, coconut husks, groundnut shells, etc. In Code '6', i.e. "LPG/PNG", LPG refers to Liquefied Petroleum Gas supplied in cylinders and PNG refers to Piped Natural Gas where natural gas is supplied to Households by pipes. All remaining codes are self-explanatory. There may be cases that a Household is having LPG/PNG connection but using any other fuel for example firewood as a main source of cooking. In such a case, 'Firewood' will be treated as the main fuel used for cooking and Code '1' will be selected. There may also be cases that a Household using LPG/PNG only as the fuel used for cooking do not have LPG/PNG connection, but using Mini Cylinders. In such a case, 'LPG/PNG' will be the main fuel used for cooking and Code '6' will be selected. So, these two questions need to be asked independent of each other.

The screenshot shows the 'HLO Data' app interface. At the top, it says 'Confidential when filled' and 'Line No: 001 CH No: 0001'. Below this is a section titled 'Amenities available to the household'. The main question is '25. Main fuel used for cooking'. It lists 10 options with radio buttons: 1-Firewood, 2-Crop residue, 3-Cowdung cake, 4-Coal/lignite/charcoal, 5-Kerosene, 6-LPG/PNG, 7-Electricity, 8-Bio-gas, 9-Solar, and 0-Any other. At the bottom, there are three buttons: 'Prev', 'Jump', and 'Next'.

Questions 26-32: ASSETS POSSESSED BY THE HOUSEHOLD

Assets possessed and available to the Household will be considered as available even if, it is used for commercial purposes.

Q. 26: RADIO/TRANSISTOR

- *Select the option on whether Radio/Transistor is being possessed by the household from the given options.*
- *Click on the next button to proceed to the next screen.*

5.1.78 If the Household has a traditional radio set or a transistor or both, select **Code '1'-Traditional radio Set**, irrespective of the presence of a smartphone. If the Household has access of radio on mobile phone, select **Code '2'- On Mobile/ Smartphone**. If Household is using some other device like car stereo for the said purpose, select **Code '3'-On Other Device**. If none of these are available with the Household, select **Code '4'-No** in this Question.

5.1.79 Radio may be accessed through many devices other than the traditional radio set like on mobile, iPod, Car Stereo or on any other device. The radio services can even be accessed on PC/laptop/TV using internet. You should confirm from household about access of radio channel and record code accordingly. If a household has both a smartphone and a traditional radio set, do not assume that the radio is accessed through the smartphone. **In case a Household reports access of more than one device, the primary device on which most of the members of Household listen radio channels is to be selected here. Carvaan is a digital audio player that includes a built-in FM radio, allowing it to function as a home radio as well as a music player, record as "On Other Device".**

Q. 27: TELEVISION

5.1.80 The details of various platforms/ modes through which Television is being watched by the household are given below:

- *Select the option regarding whether Television is being possessed and the mode/platform being used by the household for watching Television.*
- *Click on the next button to proceed to the next screen.*

The screenshot shows a mobile application interface for 'HLO Data'. At the top, there's a status bar with the time 14:33 and battery level 40%. Below the header, it says 'Confidential when filled' and 'Line No: 001 CH No: 0001'. A section titled 'Assets possessed by the household' contains question 26: 'Radio/Transistor'. Under 'Yes', there are three radio button options: '1-Traditional radio set', '2-On mobile/smartphone', and '3-On any other device'. Under 'No', there is one radio button option: '4-No'. At the bottom, there are three buttons: 'Prev', 'Jump', and 'Next', and a navigation bar with three icons.

The screenshot shows a mobile application interface for 'HLO Data'. At the top, there's a status bar with the time 14:33 and battery level 40%. Below the header, it says 'Confidential when filled' and 'Line No: 001 CH No: 0001'. A section titled 'Assets possessed by the household' contains question 27: 'Television'. Under 'Yes', there are four radio button options: '1-Doordarshan free dish', '2-Other DTH/Dish', '3-Cable connection', and '4-Any other'. Under 'No', there is one radio button option: '5-No'. At the bottom, there are three buttons: 'Prev', 'Jump', and 'Next', and a navigation bar with three icons.

DTH/Dish

- 5.1.81 DTH/Dish is a digital satellite service that provides TV signals directly to subscribers. DTH/Dish TV signals are received by the subscribers directly from the satellite by using a small outdoor dish antenna that is mounted to point towards satellite.

Code '1'-Doordarshan Free Dish: Doordarshan (DD) free DTH TV is the country's only open access Direct to Home service by the Doordarshan, which is provided free of cost and there are no monthly subscription charges. Select Code '1' for DD free dish.

Code '2'-Other DTH/Dish: For other DTH/Dish which is on payment basis for example Tata sky, Dish TV, Airtel, etc., select Code '2'.

Code '3'- Cable Connection: It means receiving TV programme services through a cable operator (Multisystem Operator/Local Cable operator) via cable network. In this case, select Code '3'.

Code '4'- Any Other: Television Channels could be watched through any other mode not listed above may be selected in Code '4'.

Code '5' -No: If the Household does not have the Television, select Code '5'.

Q. 28: ACCESS TO INTERNET

- 5.1.82 If the Household has access to internet within Census House through any mode like Dial-up (through telephone lines), Digital Subscriber Line (DSL), Cable, Wireless/Wi-Fi, Satellite or Cellular etc. and/or internet is being used on any of the devices like Computer, Laptop, Tablet, Smartphone, this facility will be treated as available for the Household. Select **Code '1'-On Laptop/Computer** if the Household is accessing internet on Laptop/computer, select **Code '2'-On-Mobile/Smartphone** if accessed internet on mobile/smartphone. If access to internet is on any other device select **Code '3'- On Other Device**. If Household doesn't have access to internet, select **Code '4'-No**.

- 5.1.83 If the household is accessing internet on more

- *Select the option regarding whether Internet facility is being used by the household.*
- *Now proceed to Q. 29.*

The screenshot shows a mobile application interface for 'HLO Data'. At the top, there's a status bar with the time 17:18 and battery level 47%. Below the title bar, it says 'Confidential when filled' and shows 'Line No: 001' and 'CH No: 0001'. A section titled 'Assets possessed by the household' contains two questions: '28. Access to internet' and '29. Laptop/Computer'. For question 28, there are 'Yes' and 'No' options, each with three radio button choices. For question 29, there are '1-Yes' and '2-No' radio button choices. At the bottom, there are 'Prev', 'Jump', and 'Next' buttons, and a navigation bar with three icons.

than one device or different members are using different devices for access of internet then indicate the device which is primarily or predominately used by household. If a household has access to public wifi, it has to be treated as accessing internet and the code will be as per the device through which public wifi is accessed.

Q. 29: LAPTOP/COMPUTER

5.1.84 If the Household has a laptop/notebook computer/desktop/computer for use by one or more members in the Household, select Code '1', or else select Code '2'. It will be auto filled in access to internet is through Laptop/Computer.

- *Select the option whether Computer/Laptop are being possessed by the household.*
- *Click on the next button to proceed to the next screen.*

Q. 30: TELEPHONE AND MOBILE PHONE/ SMARTPHONE

- *Select the option whether Telephone and mobile phone/smartphone is possessed by the Household.*
- *Click on the next button to proceed to the next screen.*

5.1.85 If the Household has landline only, select Code '1'-Landline only and if the Household has only mobile phone, Code '2'- Smartphone or Code '3'-Other Basic Mobile need to be selected based on whether having smartphone or any other basic mobile respectively. If the Household has the landline as well as mobile phone, (either smartphone and/or basic mobile) select Code '4'-Both. If none of these is available with the Household, select Code '5'-None.

Q. 31: BICYCLE AND SCOOTER/MOTOR CYCLE/MOPED

5.1.86 If the Household has the bicycle only, select Code '1'-Bicycle. **Tricycle used by disabled persons will also be considered as bicycle.**

5.1.87 If the Household has only Scooter and/or Motorcycle and/or Moped, select Code '2'-Scooter/ Motorcycle/Moped. The availability of two-wheeler needs to be ascertained from the respondent. **This asset will**

be treated as available if the Household has any type of two wheeled motorized vehicle. If the Household has both bicycle as well as Scooter/ Motorcycle/ Moped, select Code '3'-Both. If none of these assets are available with the Household, select Code '4'-None.

- *Select the option regarding possession of two-wheeler vehicles by the household.*
- *Now proceed to Q.32.*

Q. 32: CAR/JEEP/VAN

- *Select the option whether four-wheeler Car/ Jeep/Van is being possessed by the household.*
- *Click on the next button to proceed to the next screen.*

5.1.88 The availability of four-wheeler such as Car/ Jeep/Van in the Household needs to be ascertained from the respondent. This asset will also be treated as available to the Household, if any member(s) of the Household possess a multi utility vehicle (MUV) or sports utility vehicle (SUV) or sports car. If available, Code '1'-Yes is to be selected, otherwise select Code '2'-No.

Q. 33: MAIN CEREAL CONSUMED IN THE HOUSEHOLD

- *Select the option regarding main cereal consumed by the household.*
- *Click on the next button to proceed to the next screen.*

5.1.89 The consumption of cereal will include both home grown and purchased cereal and cereal products.

5.1.90 If the household consumes mainly rice or rice products like chirwa, khoi, lawa, muri, rice powder, etc. which are prepared by splitting, frying, powdering, parching of the grain, then Code '1'-Rice will be selected. If the household consumes mainly wheat or wheat products like maida, rawa, suji, dalia, etc. that is, wheat in its powdered/cracked form and other wheat products like biscuits, cakes etc., then Code '2'-Wheat will be selected. If the household consumes mainly jowar or jowar products like jowar biscuits etc., then Code '3'-Jowar will

be selected. If the household consumes mainly bajra or bajra products, then Code '4'-Bajra will be selected. If the household consumes mainly maize or maize products like cornflakes, corn flour etc., then Code '5'-Maize will be selected. If the household mainly consumes any other cereal like oat, barley, ragi, small millets etc. or consumes any cereal substitutes or any other food item, then Code '6'-Any other will be selected.

Q. 34: MOBILE NUMBER

- *Enter the Mobile number of one of the household members.*
- *Press the Submit button.*
- *PREVIOUS: Click the Previous button to return to the previous screen.*

5.1.91 The functional/active mobile number (10 digits) of one of the members of the Household needs to be entered. **This number will be used only for communication pertaining to Census purpose. In case of locked/vacant Census Houses, if mobile number of any member of Household is available from the neighbour(s), it needs to be entered.**

5.1.92 After submitting the data of each census house review all answers and then click confirm button. Similarly, complete the collection of data of all census houses of your entire HLB with precision in order to avoid editing in future. When the data collection of entire HLB is completed, ensure that no editing of the synced data or any updation of data is required. In case of any such need go to the respective button depending upon the condition i.e. "Edit already synced data" or "Updating data".

- 5.1.93 Click the “Mark As Complete” button to manage and reflect the completion status of HLB and it’s blocking after the finalization.
- 5.1.94 Once, the data collection of your assigned HLB has been completed, sync the data finally by clicking the “**Sync**” button. Now confirm the HLB completion by selecting the check box. Then mark your signatures in the space provided below with your finger. After signing click “Save and Sync” button.

Important note: Code list for all questions is at ANNEXURE IV and images are at ANNEXURE V for reference

Summary

A. Before Starting Fieldwork

- Install and login to the verified HLO App using credentials.
- Check location details and enter estimated Buildings & Census Houses as per Layout Map.
- Ensure Building numbers and Census House numbers are already marked on ground.

B. While Entering Data in HLO App

- Use correct button:
 - Houselist Entry → new record
 - Updation Data → unsynced edit
 - Edit Already Synced Data → synced edit
 - Sync → upload data
 - Mark as Complete → finalize HLB
- **Building No.** → Write in the App as marked on building.
- **Census House No.** → auto-generated; write it at entrance with marker.
- **Line No. & Household No.** → auto-generated.

C. Self-Enumeration (SE)

- Ask whether Self-Enumeration is completed.
- If Yes:
 - Enter SE ID, verify data.
 - Accept if correct or Edit if required.
- Edited SE records are tagged for Supervisor review.

D. Structure & Use of Census House

- For Q4–Q6 (Floor/Wall/Roof):
 - Record predominant material only.
 - Ask respondent if plastered material is unclear.
 - Skip for locked/vacant houses.
- Q7 (Use of Census House):
 - Residence / Residence-cum-use / Non-residential.
 - Always specify exact use (e.g. Residence-cum-shop).
 - Seasonal use must also be recorded.
- Vacant ≠ Locked:
 - Locked (occupants away) → record actual use.
 - Vacant → mention reason clearly.

E. Household Details

- One Census House may have multiple Households – number each separately.
- Count normal residents only (include absent members, exclude visitors).
- Head of Household may be of any gender.
- For Institutional HHs → enter designation, not name.
- SC/ST status is based on official lists and respondent reply.

F. Amenities & Assets (Ask Carefully)

- Select main source / predominant use if multiple options exist.
- Distance rules matter (Water: 100m urban / 500m rural).
- Shared ≠ Public (latrine/bathroom).
- LPG connection ≠ main cooking fuel (ask separately).
- Assets are counted even if used commercially.

G. Final Steps

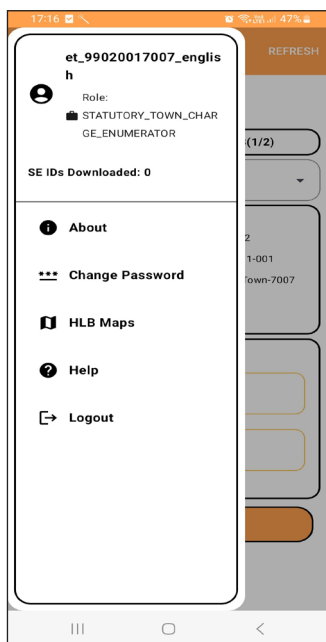

- Review each Census House before confirming.
- Sync data frequently to avoid loss.
- After full HLB completion:
 - Ensure no pending edits.
 - Click “Mark As Complete” to lock HLB.

Golden Rule

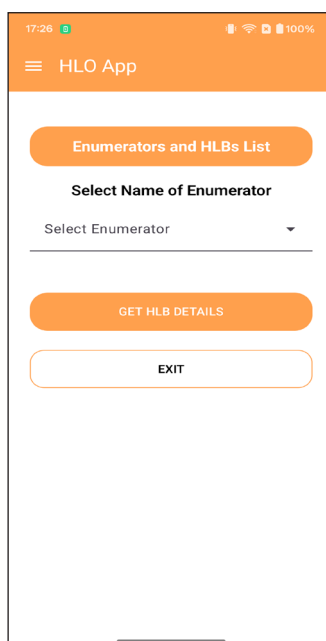

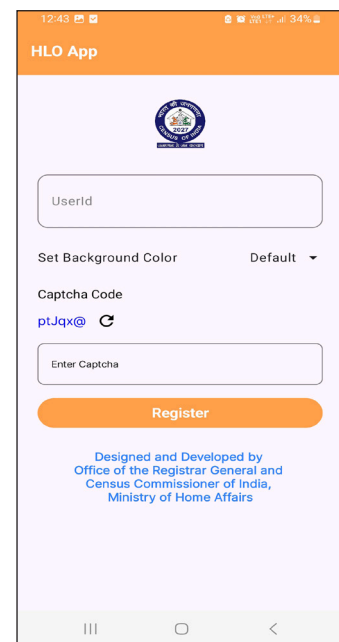

Ask → Verify → Record → Review → Sync → Mark Complete

5.2 SUPERVISOR MODULE

5.1.95 The supervisor has to login to his Supervisor Module as explained below to view and check the HLB details of his /her Enumerator.

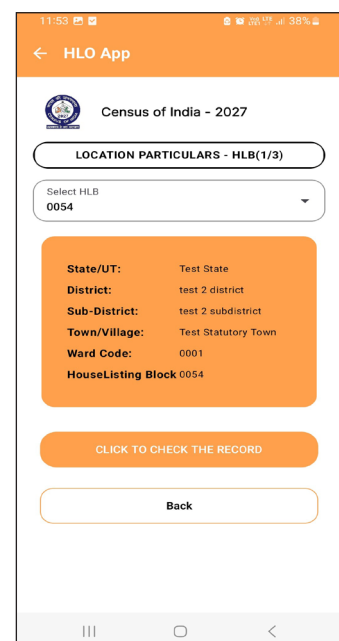

- *Fill the User ID and Password*
- *Select Supervisor from the dropdown*
- *Enter Captcha*
- *Press the Login button*
- *Next screen will appear*

- *Select Enumerator and Its associated HLB From the dropdown*
- *Select GET HLB DETAILS to view info*

- *Click on check record to view the household data of that HLB*
- *Click on Summary Button to View Summary of the Houses.*

- *The Fetch button will fetch the data of that particular house*
- *Data will be fetched using Line Number*
- *View already filled data - the form filled for the house*
- *The screen beside it will have a Format of answers of the filled 34 questions for the Supervisor's review*

- *It consists of Remarks button for any correction or updating of data, if Supervisor wants to, he/she can also add the remarks in the dialogue box after clicking on the remarks button.*
- *In case of any discrepancies in the records, the supervisor should enter appropriate remarks.*

- *The 'HLB Completed' option can only be selected after all records have been thoroughly reviewed by the Supervisor.*
- *Once the HLB is marked as completed, the Supervisor must provide their signature.*
- *Only then will the data be eligible for synchronization.*

Summary

- Supervisor must login using Supervisor credentials to access the Supervisor Module.
- The module enables viewing of HLB-wise details of attached Enumerators.
- Supervisors can monitor progress, completeness, and data quality of HLO entries.
- Synced and edited records, including tagged Self-Enumeration (SE) edits, can be reviewed.
- Supervisor should cross-check coverage, numbering consistency, and logical accuracy.
- Any discrepancies or omissions must be immediately communicated to the Enumerator for correction.
- Ensure that HLBs are marked complete only after full verification.
- Supervisor Module is a monitoring and quality-control tool, not for routine data entry.

6. SELF-ENUMERATION (SE)

Along with the house-to-house enumeration done by the Enumerator, for the first-time option of Self-enumeration for household will be available for Census 2027 wherein, respondent can fill the Census questionnaire by themselves.

6.1 What is Self-Enumeration?

- 6.1.1 Self-Enumeration (SE) is an innovative and convenient option that allows any respondent in a normal household to fill out their household's information online from the comfort of their home/office or anywhere using a secure web portal. This is a monumental step towards a more modern, efficient, and inclusive data collection process.

6.2 Methodology of Self Enumeration in Houselisting and Housing Census (HLO)

- 6.2.1 A dedicated web portal, accessible on desktop/laptop or mobile device, will be made available to public to enter their household details starting 15 days before start date of HLO field work in a State/UT.
- 6.2.2 To ensure that data is accurately placed, households will be required to provide their location details. State, District are to be selected from drop-down and Village/Town/Locality/Hamlet/Landmark are to be entered mandatorily. PIN Code may also be entered to facilitate correct identification of location. The portal will also prompt to pinpoint the exact location of the house on a digital map interface, to ensure the precise mapping of the house and corresponding availability of the SE house to the concerned Enumerator.
- 6.2.3 The questions in SE portal will be worded in the same way as HLO Mobile App and the options will also be shown in the same way as designed in Mobile App. However, some fields will be pre-filled/inactive for SE and the same will be filled by the Enumerator (detailed in role of Enumerator). FAQ and Tool Tip will be provided to facilitate the respondent to do the SE properly.
- 6.2.4 Once a household successfully submits their information, a unique SE ID will be generated and provided to them via SMS and email (if provided) with an instruction that the SE ID should be shared with the Enumerator visiting the household.

6.3 Role of Enumerators in households who have done Self Enumeration

- 6.3.1 As an Enumerator, your role remains vital: you will conduct door-to-door visits and are responsible for collecting data from households that choose the traditional method, but also for verifying and validating the data submitted by households that completed SE.
- 6.3.2 After completion house numbering and preparation of Layout map, you will download and register in the HLO App from Google Playstore / Apple

Appstore and login as Enumerator. Further, the data of all SE Households in your extended HLB (area bigger than your HLB to avoid omissions of households located in the boundary of your HLB) will be imported in your mobile App. This means that when you go into the field, you will have the list of relevant SE IDs for your jurisdiction, ready for validation via the HLO Mobile App. . The questions and responses for verification of the SE households' data will appear in the language chosen by you but the Name of the Head of Household will appear in the language chosen by the respondent.

Summary
• Self-Enumeration (SE) is introduced for the first time in Census 2027, allowing normal households to fill HLO details online. • SE is done through a secure web portal using mobile number and OTP, from 15 days before HLO start date. • Households must enter location details (State, District, Village/Town/Locality/Hamlet/Landmark) and pinpoint their house on digital map. • SE questions and options are identical to the HLO Mobile App; FAQs and tooltips assist respondents. • On successful submission, a unique SE ID is generated and sent to the household via SMS/email. • SE household data for an extended HLB area is pre-loaded in the Enumerator's HLO App to avoid boundary omissions. • Enumerator's role remains essential: door-to-door visit is mandatory to identify the households which have done SE. • During field visit, Enumerator must collect SE ID for SE households, review data, accept or edit if required, and submit through HLO App. • Edited SE records are tagged for special review by Supervisor. • SE improves coverage, convenience, and efficiency, but final responsibility for data accuracy lies with Enumerator.

ANNEXURE - I: Extract of relevant Sections under the Census Act, 1948 (Act No. 37 of 1948)

Section 8. Asking of questions and obligation to answer -

- (1) A Census officer may ask all such questions of all persons within the limits of the local area for which he is appointed as, by instructions issued in this behalf by the Central Government and published in the Official Gazette, he may be directed to ask.
- (2) Every person of whom any question is asked under sub-section (1) shall be legally bound to answer such question to the best of his knowledge or belief:

Provided that no person shall be bound to state the name of any female member of his Household, and no woman shall be bound to state the name of her husband or deceased husband or of any other person whose name she is forbidden by custom to mention.

Section 9. Occupier to permit access and affixing of numbers -Every person occupying any house, enclosure, vessel or other place shall allow Census-officers such access thereto as they may require for the purposes of the Census and as, having regard to the customs of the country, may be reasonable, and shall allow them to paint on, or affix to, the place such letters, marks or numbers as may be necessary for the purpose of the Census.

Section 11. Penalties -

- (1) (a) any Census-officer or any person lawfully required to give assistance towards the taking of Census who refuses to perform any duty imposed upon him by this Act or any rule made thereunder, or any person who hinders or obstructs another person in performing any such duty, or
 - (aa) any Census-officer or any person lawfully required to give assistance towards the taking of a Census who neglects to use reasonable diligence in performing any duty imposed upon him or in obeying any order issued to him in accordance with this Act or any rule made thereunder, or any person who hinders or obstructs another person in performing any such duty or obeying any such order, or
- (b) any Census-officer who intentionally puts any offensive or improper question or knowingly makes any false return or, without the previous sanction of the Central Government or the State Government, discloses any information which he has received by means of, or for the purposes of, a census return, or
- (c) any sorter, compiler or other member of the census staff who removes, secretes, damages or destroys any census document or

- deals with any census document in a manner likely to falsify or impair the tabulations of census results, or
- (ca) any local authority which fails to comply with an order made under section 4A, or
- (d) any person who intentionally gives a false answer to, or refuses to answer to the best of his knowledge or belief, any question asked of him by a Census-officer which he is legally bound by section 8 to answer, or
- (e) any person occupying any house, enclosure, vessel or other place who refuses to allow a Census-officer such reasonable access thereto as he is required by section 9 to allow, or
- (f) any person who removes, obliterates, alters, or damages any letters, marks or numbers which have been painted or affixed for the purposes of the Census, or
- (g) any person who, having been required under section 10 to fill up a schedule, knowingly and without sufficient cause fails to comply with the provisions of that section, or makes any false return thereunder, or
- (h) any person who trespasses into a census office shall be punishable with fine which may extend to one thousand rupees and in case of a conviction under part (a), (b) or (c) shall also be punishable with imprisonment which may extend to three years
- 2) Whoever abets any offence under sub-section (1) shall be punishable with fine which may extend to one thousand rupees.

Section 15. Records of Census not open to inspection nor admissible in evidence- No person shall have a right to inspect any book, register or any magnetic or electronic record made by a Census officer in the discharge of his duty as such, or any schedule delivered under section 10, and notwithstanding anything to the contrary in the Indian Evidence Act, 1872, no entry in any such book, register, any magnetic or electronic record or schedule shall be admissible as evidence in any civil proceeding whatsoever or in any criminal proceeding other than a prosecution under this Act or any other law for any act or omission which constitutes an offence under this Act.

15A. Protection of service interests of members of Census staff - No member of the Census staff shall suffer any disability in service by reason of his being on Census duty and the period spent by him on such Census duty shall be deemed to be the duty under his lending employer and any duty performed under this Act shall not in any manner affect the right of promotion or other advancement in his original service.

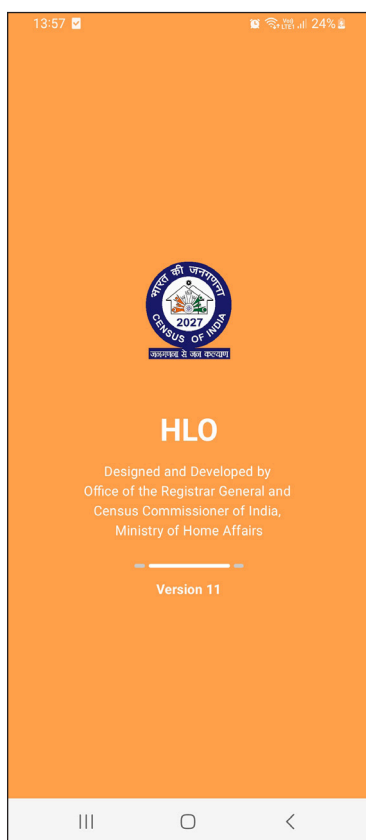

- 15 B. **Protection of action taken in good faith** - No suit, prosecution or other legal proceeding shall lie against the Census Commissioner or any Director of Census Operations or any census-officer or any member of the Census staff for anything which is in good faith done or intended to be done under this Act or the rules made thereunder.

ANNEXURE – II: Installation of Houselisting and Housing Census (HLO) Mobile App

App Requirement - Device Specifications:

Android Version 11.0 and above
IOS Version 15.0 and above
RAM capacity 4 GB and above

Note: Keep your User ID and Password received during Houselisting Block allocation handy

STARTING THE APP

This will be the initial splash page of the App after which the App will guide you further.

REGISTERING AS A USER (Step-by-step PROCESS)

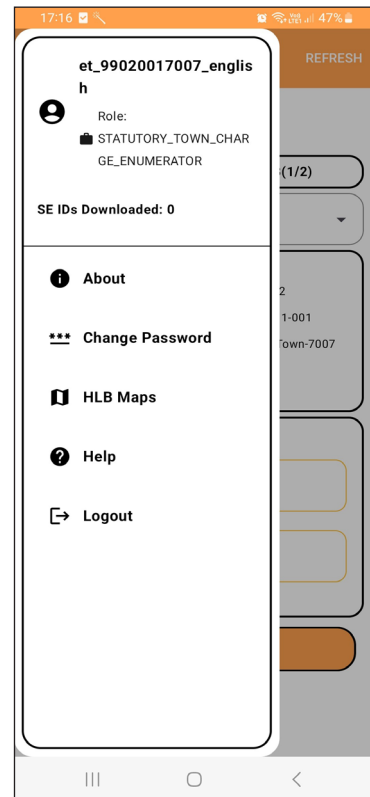

1. Enter User ID and Captcha
2. Click Register
3. Enter OTP
4. Click Verify OTP
5. Enter Password
6. Click Submit

SET PHONE PIN

While registration, user needs to set phone pin. After setting pin, every time coming back to App, pin will be asked.

HOUSELIST OPERATIONS

ANNEXURE – III: Important instructions for Paper Schedule

After preparation of Layout Map of the Houselisting Block (HLB) and the numbering of the Buildings and Census Houses, the next step is to list all the Buildings, Census Houses and Households in the Houselisting and Housing Census Schedule herein consisting of 34 Columns. The specimen of the Houselisting & Housing Census Schedule is given at the middle of this manual which may be detached and used.

Important instructions to be followed while filling the Houselisting and Housing Census Schedule

- Page numbers, State Code and District Code will be of 2 digits only.
- Code for Tehsil/Taluka/Dev. Block/Circle/Mandal will be of 3 digits.
- Town/Village Code, Ward Code and Houselisting Block No. and census house number will be of 4 digits.
- *Ward Code is to be filled only for town's Houselisting Block.*
- Only one language from specified languages is to be used to fill-up the Schedule.
- Mobile Number should be ensured to be of 10 digits only.
- Ensure page numbering on each page of all the Schedules used, starting from Side 'A' of the Schedules.
- These Schedules should be handled carefully to avoid any damage to them.
- Don't leave filled-in or blank Schedule inadvertently anywhere in the field during Houselisting & Housing Census.
- Maintain a proper account of the number of Blank Schedules received, Schedules used, spoiled and unused as you are required to submit these back to the Charge Officer.

Detailed instructions to fill up the Houselisting and Housing Census Schedule

LOCATION PARTICULARS

1.1 Location particulars consist of seven fields, which are as under:

- If an Enumerator has been allotted the work of more than one Houselisting Block, it is required to be ensured that the page numbering of the Schedules in respect of each block will start from 01 and run continuously within each Houselisting Block.
- Before start of Houselisting field work, the name of State/UT, District, Tehsil/Taluka/Dev. Block/Circle/Mandal, Town/Village, Ward Code and Houselisting Block Number along with their respective Code for assigned Houselisting Block is to be recorded mandatorily/correctly copying it from Appointment Letter.

- Please take extra caution in writing the Code numbers for Village/Town in the prescribed boxes. Even a small mistake may lead to wrong identification of Village/Town.

Col. 1: LINE NUMBER

- 1.2 Every line in the Houselisting Schedule is to be numbered serially. The line numbers should be continuous for your Houselisting Block. Three boxes are provided under this Column to write the line number. Start the line number from 001 followed by 002, 003 and so on. On reaching double digit line number, record line numbers as 010, 011, 012 ... etc. For three-digit line numbers, the entry under this Column would be as 100, 101, 102 and so on. In case later on if you strike out any entry due to any reason, you need not change the series of the continuous number under this Column. Please remember that whenever you begin the use of fresh Houselisting Schedule for listing of houses; always start from the side 'A'.

Col. 2 & Col. 3 : Building number and Census house number

- 2.3 The building numbers are to be copied from Layout maps. (For details, please refer para 4.3.12 of Chapter 4). The number assigned in the Layout map which is already put on the Building or painted on the Building is to be entered in this column. If the Building has more than one Census house, then the building numbers is to be recorded only for the first census house and a dash (-) will be put for the other Census Houses. For Census houses, serial number starting from 0001. It may please be noted that only numerals as indicated in the Schedule should only be used for marking Building/ Census House numbers.
- 2.4 **Details on Assigning number to Buildings is given in Chapter 4 at para 4.3.**

Cols. 4, 5 and 6: PREDOMINANT MATERIAL OF THE FLOOR, WALL AND ROOF

- 2.5 If any Census House is occupied by more than one Household, the entries in Cols. 4, 5 and 6 will be made only for the first Household and dashes (-) will be entered for each subsequent Household.
- 2.6 If the Census House was found locked because the occupants have gone on a journey or pilgrimage, then it should not be treated as 'Vacant'. In this case, the actual use of house should be recorded and the fact that the occupants have gone on journey or pilgrimage may be noted as 'House locked - occupants on journey/pilgrimage'. In such a case, no details are to be filled-in under Columns 8 to 33. However, in case of Column 34, if mobile number of any member of the Households is available from the neighbour(s), it needs to be recorded. If mobile number is not available, it does not need to be recorded.
- 2.7 If a Census House has more than one Household in it, do not repeat the word 'Residence' in subsequent lines in Column 7. Similarly, in such cases, there will be no entries under Columns 4, 5, 6 and 8 and only dashes (-) will be put under

these Columns. This is mainly because this is a single house and the predominant material of its floor, wall and roof in Columns 4 to 6; its use in Column 7 and condition of the Census House under Column 8 should appear only once.

Col. 8: *The Institutional Households do not come under the purview of the question.*

Col. 9: HOUSEHOLD NUMBER

- 2.8 All the Normal Households in the Houselisting Block are to be serially numbered starting from 001, 002 and so on. For the Institutional Households, '999' will be entered to distinguish Institutional Households from Normal Households. If Code 1 or 2, i.e. 'Residence' or 'Residence-cum-other use', is recorded in the box under Column 7, invariably there should be an entry under Column 9. If a Census House contains more than one Household, the Census House number should not be repeated in the subsequent lines, and the details under Columns 4 to 8 will also not be repeated in the subsequent line(s).
- 2.9 It is possible that there may be more than one Household in a Census House. Each such Household should also be given a separate number. For example, if you have already assigned serial number 008 to the Households up to Building number 5 and you have taken up Census Houses in Building number 6 for listing in the Houselisting Schedule. The different situations may arise are illustrated through the following examples:

Particulars	Building Number 2	Census House Number 3	Household Number 9
Situation 1 Building Number 6 having one Census House and used for non-residential purposes	6	0008	-
Situation 2 Building Number 6 having one Census House and one Household	6	0008	009
Situation 3 Building Number 6 having one Census House and two Households	6	0008	009
	-	-	010
Situation 4 Building Number 6 having two Census Houses and one Household each	6	0008	009
	-	0009	010

Particulars	Building Number 2	Census House Number 3	Household Number 9
Situation 5 Building Number 6 having two Census House and three Households in one and two Households in other	6	0008	009
	-	-	010
	-	-	011
	-	0009	012
	-	-	013
Situation 6 Building Number 6 having three Census Houses. In the first Census House there lives a normal Household and in the second, an institutional Household and in the third, a normal Household	6	0008	009
	-	0009	999
	-	0010	010

2.10 The numbering of the Buildings, the Census Houses and the Households are closely linked.

2.11 For Column number 8, 12, 13, 14, 18, 19, 20, 22, 26-29, 32: Choose the right alternatives and write in the respective cell. For Column number 4, 5, 6, 7, 17, 21, 24, 25, 30 & 31: Use the codes as given below appropriately.

Columns 9-13 are to be canvassed only for those Census Houses which is used wholly or partly as a Residence i.e. Code '1' or '2' in Col. 7 is recorded. In other cases, put dash (-) under Columns 9-13.

Cols. 14-34 are to be recorded for all the Normal Households to whom a separate Household number is given under Col. 9.

For Institutional Households as well as Non-Residential Census House, the information under Columns 14 to 34 is not required and therefore, dashes (-) are to be put under these Columns.

Please note: The submission of the records will be only digitally. You are requested to submit the information either through the mobile App or through the portal. However, used/unused paper schedules are to be handed over to the charge officer.

ANNEXURE – IV: Code list for Questions of House listing & Housing Census

Q.4 Predominant material of Floor

Mud.....	1
Wood/bamboo.....	2
Burnt brick.....	3
Stone.....	4
Cement.....	5
Mosaic/floor tiles.....	6
Any other.....	7

Q.5 Predominant material of Wall

Grass/thatch/bamboo etc.....	1
Plastic/polythene.....	2
Mud/unburnt brick.....	3
Wood.....	4
Stone not packed with mortar.....	5
Stone packed with mortar.....	6
G.I./metal/asbestos sheets.....	7
Burnt brick.....	8
Concrete.....	9
Any other.....	0

Q.6 Predominant material of Roof

Grass/thatch/bamboo/Wood/mud etc.....	1
Plastic/polythene.....	2
Handmade tiles.....	3
Machine made tiles.....	4
Burnt brick.....	5
Stone.....	6
Slate	7
G.I./metal/asbestos sheets.....	8
Concrete.....	9
Any other.....	0

Q.7 Ascertain Use of Census House

Residence.....	1
Residence-cum-other use.....	2
Shop/office.....	3
School/ college etc.....	4
Hotel/ lodge/ guest house etc.....	5
Hospital/ dispensary etc.....	6
Factory/ workshop/ workshed, etc.	7
Place of worship.....	8
Other non-residential use.....	9
Vacant.....	0

Q.8 Condition of this Census House

Good.....	1
Livable.....	2
Dilapidated.....	3

Q.12 Sex

Male.....	1
Female.....	2
Transgender Person.....	3

Q.13 If SC or ST or Other

SC.....	1
ST.....	2
Other.....	3

Q.14 Ownership status of this House

Owned.....	1
Rented but has own house elsewhere.....	2
Rented and doesn't own any house.....	3
Any other.....	4

Q.17 Main source of drinking water

Tap water from treated Source...	1
Tap water from un- untreated source.....	2
Well.....	3
Hand Pump.....	4
Tubewell/Borehole.....	5
Spring.....	6
River/canal.....	7
Tank/Pond/Lake.....	8
Packaged/Bottled water.....	9
Other sources.....	0

Q.18 Availability of drinking water source

Within premises.....	1
Near premises.....	2
Away.....	3

Q.19 Main source of lighting

Electricity.....	1
Kerosene.....	2
Solar.....	3
Other Oil.....	4
Any other.....	5
No lighting.....	6

Q.20 Access to Latrine**Yes**

Exclusively for household use only.....	1
Shared with other household...	2
Public Latrine.....	3

No

Open.....	4
-----------	---

Q.21 Type of Latrine**Flush/pour flush latrine connected to**

Piped sewer system	1
Septic tank.....	2
Other system.....	3

Twin Pit latrine:

With slab/ventilated improved pit.....	4
Without slab/open pit.....	5

Single Pit latrine:

With slab/ventilated improved pit.....	6
Without slab/open pit.....	7

Service latrine:

Night soil removed by human...	8
Night soil serviced by animals...	9

Night soil disposed into open drain**Q.22 Waste water outlet connected to**

Closed drainage.....	1
Open drainage.....	2
No drainage.....	3

Q.23 Bathing facility available within the premises**Yes**

Bathroom.....	1
Enclosure without roof.....	2

No

No.....	3
---------	---

Q.24 Availability of kitchen and LPG/ PNG Connection**Cooking in kitchen**

Has LPG/PNG Connection	1
Doesn't have LPG/PNG Connection.....	2

Cooking inside house, but not in kitchen

Has LPG/PNG Connection..... 3

Doesn't have LPG/PNG
Connection 4**Cooking in open/ outside house:**

Has LPG/PNG Connection..... 5

Doesn't have LPG/PNG
Connection..... 6**No cooking** 7**Q.25. Main Fuel used for cooking**

Firewood..... 1

Crop residue..... 2

Cow dung cake..... 3

Coal/lignite/charcoal..... 4

Kerosene..... 5

LPG/PNG..... 6

Electricity..... 7

Bio-gas..... 8

Solar..... 9

Any Other..... 0

Q.26 Radio/Transistor**Yes**

Traditional radio set..... 1

On mobile/smartphone..... 2

On other device..... 3

No

No..... 4

Q.27 Television:**Yes**

Doordarshan free dish..... 1

Other DTH/Dish..... 2

Cable connection..... 3

Any other..... 4

No..... 5**Q.28 Access to Internet****Yes**

On Laptop/Computer..... 1

On mobile/smartphone..... 2

On any other device..... 3

No

No..... 4

Q.29 Laptop/Computer

Yes..... 1

No..... 2

**Q.30 Telephone/Mobile Phone/
Smartphone****Yes:**

Landline only..... 1

Mobile only:

Smartphone 2

Other basic mobile 3

Both 4

No..... 5

Q.31 Bicycle and**Scooter/Motorcycle/Moped:**

Bicycle..... 1

Scooter/Motorcycle/Moped.... 2

Both..... 3

None..... 4

Q.32 Car/Jeep/Van

Yes..... 1

No..... 2

**Q.33 Main cereal consumed in the
household**

Rice..... 1

Wheat..... 2

Jowar..... 3

Bajra..... 4

Maize..... 5

Any other 6
